

## **2019 Reference Year Adjustment Factors for Contract Seed Dry Peas**

The quadruple asterisk (\*\*\*\*) in the table below designates which year's RYAF is to be used in adjusting the current year's T-Yield (2019) for standard T-Yield variable percentages or yield floor computations.

For low actual yields in years 2016-2018 that are eligible for YA, remember the T-Yields contained within the actuarial documents for 2016-2018 are expressed in 2015-dollar equivalents. Use the RYAF designation within the triple asterisk (\*\*\*) to derive the corresponding year's T-Yield in its 2019 equivalent value for YA substitution purposes.

For low actual yields in years 2003 - 2015 that are eligible for YA, remember the T-yields contained within the actuarial documents for these years are expressed in 2002-dollar equivalents. Use the RYAF designated with the double asterisk (\*\*) to derive the corresponding years' T-yield in its 2019 equivalent value for YA substitution purposes.

For low actual yields in years 2002 and prior that are eligible for YA, remember the T-yields contained within the actuarial documents for these years are expressed in 1987-dollar equivalents. Use the RYAF designated with the single asterisk (\*) to derive the corresponding years' T-yield in its 2019 equivalent value for YA substitution purposes.

| 2019 REFERENCE YEAR ADJUSTMENT FACTORS |                |         |               |                       |
|--|----------------|---------|---------------|-----------------------|
| Contract Seed Dry Peas (CSP)           |                |         |               |                       |
| Crop Year                              | Columbia Basin | Palouse | Blue Mt WA/OR | Magic Valley/SE Idaho |
| 1984                                   | 2.01           | 1.77    | 1.80          | 2.29                  |
