Risk Management Education: Vermont 2013-2014; Existing and Emerging Crop Insurance Products and Good Farming Practices	The University of Vermont will take the lead on crop, livestock, and revenue insurance promotion, education, training (in English and non-English), evaluation, and reporting in Vermont under the Targeted States Program, in partnership with 11 partnering organizations and the RMA. The following farmer groups will be targeted: beginning, socially disadvantaged, farmers converting production and marketing for new markets,	Vermont	\$259,000.00
Crop Insurance Program Promotion and Education for Massachusetts' Beginning; Retiring; and Traditional Producers	To improve Massachusetts producers' awareness, understanding, and utilization of Federal crop insurance programs, the project team will focus much of its training and information delivery toward producers who may be beginning, retiring, and/or producing cranberries, Massachusetts' largest cash crop.	Massachusetts	\$234,212.00
A Crop Insurance and Risk Management Education Program for Connecticut Agricultural Producers	Disseminating information about crop insurance and risk management to producers through mailings, websites, other media, our Advisory Group and Project Partners. Educating producers on how crop insurance and risk management can help them by distributing and explaining information and fact sheets on crop insurance, providing examples for specific crop and revenue mixes, and including crop insurance education in all project programs.	Connecticut	\$250,000.00
Crop Insurance Program Promotion and Education for Utah's Beginning; Livestock; Native American; and Traditional Producers	Will help at least 200 Utah producers develop and implement a comprehensive marketing plan, a critically underutilized risk management tool.	Utah	\$309,452.00

New Hampshire Crop Insurance and Risk Management Education; 2013-14	This project will provide education and information on risk management strategies to New Hampshire farmers. Farmers will understand the risks addressed by crop and revenue insurance and how various policies may be used with other tools to reduce farming risks. The project aim is to enable New Hampshire farmers to make intelligent decisions regarding the effective and appropriate use of crop and revenue insurance along with other tools to reduce business risks.	New Hampshire	\$214,373.00
Crop Insurance Education for New Jersey Farmers	The New Jersey Department of Agriculture, in full partnership with Rutgers Cooperative Extension, will develop and implement a comprehensive crop insurance program that ensures farmers throughout the state are well informed so they know about and can use existing and emerging crop insurance products to mitigate their risks.	New Jersey	\$282,000.00
2013/2014 Crop Insurance Education Program	To deliver crop insurance education and information to Pennsylvania farmers in order to help them better understand and more fully utilize the many risk management options available.	Pennsylvania	\$700,000.00
Crop Insurance Training; Risk Management Education; and Ongoing Capacity-Building for Beginning and Established Producers in Maine	Disseminates best practices on critical risk management tools to up to 500 Maine farmers.	Maine	\$242,262.00
Risk Management & Crop Insurance Education for Hawaii's Producers; 2013-2014	Proposes to inform and educate Hawaii producers on risk management techniques including crop insurance. This effort is built around a partnership with the highly successful LIFE (Local & Immigrant Farmer Education) to target socially disadvantaged, limited resource and beginning producers with the goal of bringing them into mainstream agriculture, while also serving mainstream growers.	Hawaii	\$245,832.00

Project Name	Objective	State	Amount
Risk Management Education in Targeted States 2013	Will offer 406 individual classes to young, small, beginning, and socially disadvantaged farmers, as well as families with more traditional operations to teach them how to recognize and manage risk in their farm lives.	West Virginia	\$242,000.00
Crop Insurance Education in Targeted States Delaware	Will address the needs of Delaware producers through broad distribution of crop insurance educational materials available through RMA, and new materials and workshops developed specifically for Delaware.	Delaware	\$287,000.00
Risk Management and Crop Insurance Education for Rhode Island Growers 2013-14	To ensure that farmers in Rhode Island are sufficiently informed so they know about and can use existing and emerging crop insurance products to minimize their exposure to financial and environmental risks.	Rhode Island	\$206,000.00
Maryland Crop Insurance Promotion and Education Project	Will conduct a targeted crop insurance education and promotion program in 2013-2014 with the goals of increasing producer understanding of the kinds of risk addressed by crop insurance.	Maryland	\$371,000.00
Addressing Risk with Crop Insurance in NYS	Will deliver at least 90 face-to-face crop insurance education workshops to at least 3,500 producers. Presentations at meetings will help producers understand and evaluate the features of crop insurance, and motivate to act, by calling a crop insurance agent, to discuss and enroll in crop insurance, documented via attendee evaluations.	New York	\$586,000.00
The Business of Season Extension Farming: Training on financial planning; marketing; and new production systems	Will consist of a two-day class which will focus on three main topics: Financials (including insurance and record keeping) and Marketing and Season Extension Techniques (new production systems). Purpose is to provide the tools the agricultural community needs to start or maintain a successful business by increasing knowledge and mitigating risk factors through education.	Nevada	\$200,152.00

Project Name	Objective	State	Amount
Risk Management Education Covering Current Federal Policies and Their Implications; Machinery Costs Under Risk; Management Succession in Agriculture; Commodity Marketing; and Other Risk Management Topics for Beginning; Retiring/Transitioning; and Other Farmers and Ranchers and Interested Individuals in Wyoming 2013-14	To ensure that producers in Wyoming are fully informed so they know about and can use existing and emerging crop insurance products to mitigate their risks.	Wyoming	\$293,000.00
Nevada New; Beginning; Socially Disadvantaged and Transitioning Farmers and Ranchers Livestock and Crop Insurance Program - Davis Region	Will utilize risk management education tools to ensure the competitiveness of Nevada agriculture operations in future markets, and educate producers on how these crop/livestock insurance programs address the agricultural risks they face daily.	Nevada	\$47,848.00
