

**SUMMARY OF CHANGES FOR THE COMMODITY EXCHANGE PRICE PROVISIONS – SECTION II – CORN
(24-CEPP-0041)**

The following is a brief description of changes to the Commodity Exchange Price Provisions – Section II – Corn that will be effective for the 2024 and succeeding crop years. Please refer to the Commodity Exchange Price Provisions – Section II – Corn for complete information.

Released June 2023

- Added “oats” and “rye” to the list of crops shown in the summary box on the top of page 1.

**UNITED STATES DEPARTMENT OF AGRICULTURE
Federal Crop Insurance Corporation
Commodity Exchange Price Provisions
Section II – Corn**

The Commodity Exchange Price Provisions (CEPP) are an extension of the Common Crop Insurance Policy Basic Provisions and the Area Risk Protection Insurance Basic Provisions, along with the Crop Provisions, for the following crops: barley, canola (including rapeseed), corn, cotton, grain sorghum, oats, rice, rye, soybeans, sunflowers, and wheat.

The CEPP has two sections. Section I - General Information, contains information relevant for all applicable crops, including definitions and common policy material. Section II contains crop-specific projected and harvest price definitions and specifications, including commodity exchanges, contracts, and discovery periods and is used in conjunction with Section I – General Information. There is a separate Section II document for each crop. This is the Section II document for corn.

Grain Type Definitions

Projected price - The harvest year's average daily settlement price for the projected price discovery period for the harvest year's futures contract, as shown in the tables below, rounded to the nearest whole cent. Note: Pre-harvest year's daily settlement prices through December 31 are included in the average for the January 31 sales closing date.

Harvest price - The harvest year's average daily settlement price for the harvest price discovery period for the harvest year's futures contract, as shown in the tables below, rounded to the nearest whole cent.

CORN – January 31 Sales Closing Date

State	Commodity Exchange	Contract Commodity	Contract Month	Projected Price Discovery Period Beginning Date	Projected Price Discovery Period Ending Date	Harvest Price Discovery Period Beginning Date	Harvest Price Discovery Period Ending Date

Wyoming	CBOT	Corn	December	Feb 1	Feb 28	Oct 1	Oct 31

*February 28 Ending Date is extended to February 29 in leap years.

Silage Type Definitions

Corn for silage is not traded on any Commodity Exchange. However, revenue protection is still considered to be available in counties where silage is an insurable type and the projected and harvest prices will be determined by RMA in accordance with this CEPP. The result of this action will allow the producer to insure both the silage and grain types of corn under revenue protection. With both types of corn insured under revenue protection the producer may qualify for a whole-farm unit. However, corn insured as silage will not have the benefit of the projected price and the harvest price moving as the price on the Commodity Exchange moves for corn for grain.

Projected price - A price determined by RMA and released by January 31 of the harvest year.

Harvest price - A price equal to the silage type projected price.

Organic (Certified) Practice Definitions

Projected price - The corn (grain type) projected price as determined above, multiplied by a factor determined by RMA, rounded to the nearest whole cent.

Harvest price - The corn (grain type) harvest price as determined above, multiplied by the same factor determined for the organic (certified) practice projected price, rounded to the nearest whole cent.
