Crop Insurance Deadline Nears in North Carolina

Small Grain Producers Need to Make Insurance Decisions Soon

RALEIGH, N.C., Aug. 30, 2021 — The USDA's Risk Management Agency (RMA) reminds North Carolina small grains producers that the final date to apply for crop insurance coverage for the 2022 crop year is September 30, 2021. Current policyholders who wish to make changes to their existing policies also have until September 30 to do so.

Federal crop insurance is critical to the farm safety net. It helps producers and owners manage revenue risks and strengthens the rural economy. Coverage is available for canola in Beaufort, Camden, Iredell, Northampton, Robeson, Washington, and Wayne counties. Additional information can be found on the [Actuarial Information Browser](#) page on the RMA website.

Growers are encouraged to contact their crop insurance agent soon to learn specific details for the 2022 crop year.

Crop insurance is sold and delivered solely through private insurance agents. A list of insurance agents is available online using the RMA [Agent Locator](#). Learn more about crop insurance and the modern farm safety net at rma.usda.gov.

RMA is authorizing additional flexibilities due to coronavirus while continuing to support producers, working through Approved Insurance Providers (AIPs) to deliver services, including processing policies, claims and agreements. RMA staff are working with AIPs and other customers by phone, mail and electronically to continue supporting crop insurance coverage for producers. Farmers with crop insurance questions or needs should continue to contact their insurance agents about conducting business remotely (by telephone or email). More information can be found at farmers.gov/coronavirus.

USDA touches the lives of all Americans each day in so many positive ways. In the Biden-Harris Administration, USDA is transforming America's food system with a greater focus on more resilient local and regional food production, fairer markets for all producers, ensuring access to healthy and nutritious food in all communities, building new markets and streams of income for farmers and producers using climate smart food and forestry practices, making historic investments in infrastructure and clean energy capabilities in rural America, and committing to equity across the Department by removing systemic barriers and building a workforce more representative of America.
