Notes con't:

Rate State and Rate County can only be different from Location State and County if a written agreement is in effect.

If the yield limitation flag equals "09" and the yield type equals "A, G, GW, PA, PW, R,V or VW", then determine the substituted yield value for the year(s) with that yield type.

If the yield year equals 2001 and prior: if all elements in state/county/crop/practice/type/map area are the same as 2001 ADM, then use the 2001 ADM T-yield to determine 60% T-yield substitution for yield years 2001 and prior, use the 2002 ADM T-yield for state/county/crop/practice/type/map area if, at least, one element in the "key" is new for 2002; use the 2003 ADM T-yield for state/county/crop/practice/type/map area if, at least, one element in the "key" is new for 2003. Use the 2004 ADM T-yield for state/county/crop/practice/type/map area, if at least, one element in the "key" is new for 2004.

If the yield year equals 2002, use the ADM for RY2002 to determine the applicable T-yield.

If the yield year equals 2003, use the ADM for RY2003 to determine the applicable T-yield.

If the yield year equals 2004, use the ADM for RY2004 to determine the applicable T-yield.

Organic Option
If a crop is being insured as Organic by Written Agreement do not report the organic code in the Common Option field.

If a crop is being insured as Organic and does not need a Written Agreement, then report the applicable Common Option Code (OT = Organic Transitional acreage and OC = Organic Certified acreage.)
