Corn (0041), Soybeans (0081), Wheat (0011), Cotton (0021), Grain Sorghum (0051), Rice (0018), Barley (0091), Canola (0015), Sunflowers (0078), Flax (0031), Oats (0016), Rye (0094), Buckwheat (0114) and Safflower (0049)

Yield Limitation code must equal 09, 10, 11, or 17. Yield Limitation Code must equal "09" if QL and YA are elected together. Yield Limitation Code must equal "17" if QL is elected alone or when YE,QL and TA are elected together. When QL is elected, insureds may replace an actual yield based on total production adjusted for quality reductions (post-quality adjustment production) with an actual yield based on total production prior to any quality adjustment reductions (pre-quality adjustment production) this is referred to as QL replacement.

Release Date: 7/1/2021

Record Code: P15 Release Date: 7/1/2021 Insurance Yield Indicator Option **Code List Yield Amounts Commodity Code Yield Type Code** Code **Yield Limitation Code** Rules When Yield Cup Option is elected and submitted on the P15, the approved yield will equal 90% of the previous YC Yield Limitation code must equal 09 or 16 years approved yield, the rate yield will equal the average yield, and an adjusted yield is required. If the exclusion of actual yields for eligible crop year(s) results in less than four years of yields in the APH

Applicable for all crops eligible for APH exclusion in an eligible crop year exclusion designated in the actuarial.

ΥF

Actual yields in an APH database identified with the following yield descriptors are eligible for exclusion in an eligible crop year identified in the actuarial documents - A, AY, BF, DA, DG, DV, G, NA, NR, NW, PA, PR, PW, R, RY, and WY.

Yield Limitation Code must equal "09" if YE and YA are elected together or YE, YA, and TA are elected. Yield Limitation Code must equal "15" if YE is elected alone or YE and TA are elected together.

eligible crop year(s) results in less than four years of yields in the APH database, the applicable T-Yield is used to maintain a minimum base period of four yields.

If the variable T-Yield applies to an APH database, the T-Yield used to complete the four-year minimum base period uses the variable percentage based on the number of actual/assigned yield for the crop in the county. Excluded yield years still count as a year of producing the crop for variable T-Yield purposes.
