2016 Margin Protection Plan Projected Prices and Volatility Factors

The following 2016 CY margin projected prices and volatility factors are approved for Margin Protection Plan for rice offers with a February 28 sales closing date. The margin projected price is used in conjunction with projected input prices and the expected county yield to derive the expected margin (per acre), trigger margin (per acre) and liability. The expected margins for each crop/county are available at the following web page on RMA's public website: [Actuarial Information Browser](#)

Please see the following web page on RMA's public website for program details:
