Sugarcane Actual Production History Plan of Insurance – 2017 and Succeeding Crop Years

Background

Changes have been made to the Sugarcane Actual Production History (APH) plan of insurance for the 2017 crop year as approved on June 3, 2016, by the Federal Crop Insurance Corporation Board of Directors (Board). The approved changes are applicable to the Sugarcane policy and will be implemented via Special Provisions of Insurance and are listed below:

- 1) Coverage was added to provide protection against possible overwintering damage to stubble cane that may have been damaged the previous crop year.
- 2) The reference sugar content percentage for Louisiana used for loss adjustment was revised to 10%.
- 3) Section 34(c)(1) of the Basic Provisions regarding optional units was modified for Louisiana to recognize the larger units in the central region.

The Board approved one change to the Sugarcane Loss Adjustment Standards Handbook (LASH). The Stand Reduction Appraisal Method was revised to modify the

allowable skip from 36 inches to 15 inches in Florida and Louisiana The Board also approved the Sugarcane Insurance Standards Handbook (ISH). The ISH Insurance Handbook, and Loss Adjustment Manual.

Action

The 2017 crop year changes to the actuarial documents were released June 29, 2016. The 2017 Sugarcane LASH and the Sugarcane Insurance Standards Handbook will be released on Risk Management Agency's website by the close of business on July 29, 2016.
