Description of RMA Determinations

(Includes information reported to RMA as of March 30, 2015)

Winter Wheat / Total for Crop / Planted Yield - calculated as the acre-weighted average of 2014 wheat yields reported to RMA as actual yields by crop insurance program participants in the county.

Winter Wheat / Irrigated / Harvested Yield - calculated as the acre-weighted average of non-zero 2014 irrigated wheat yields reported to RMA as actual yields by crop insurance program participants in the county. If a participant was found to have un-harvested acreage claim(s) in 2014, acreage and appraised production from these claims was not included to assure yields were on a harvested basis consistent with the insurance offer.

Winter Wheat / Non-Irrigated Total / Harvested Yield - calculated as the acre-weighted average of nonzero 2014 non-irrigated wheat yields reported to RMA as actual yields by crop insurance program participants in the county. If a participant was found to have un-harvested acreage claim(s) in 2014, acreage and appraised production from these claims was not included to assure yields were on a harvested

basis consistent with the insurance offer.
