**WASHINGTON, Sept. 9, 2024** – The U.S. Department of Agriculture (USDA) reminds producers in Hawaii that the sales closing date to purchase Pasture, Rangeland, and Forage (PRF) rainfall index insurance is Dec. 1, 2024, for the 2025 crop year. The PRF program protects livestock producers against feed loss due to lack of precipitation, providing producers on the Big Island of Hawaii with coverage for grazing acres. This expansion was announced earlier this year and is part of USDA’s Risk Management Agency (RMA) efforts to increase and enhance insurance options in Hawaii. Policy documents are now available for the PRF Hawaii program on the RMA website.

“Producers in Hawaii now have the option to purchase coverage to protect their operation against feed losses due to a lack of precipitation,” said RMA Administrator Marcia Bunger. “The Risk Management Agency is proud to offer this program that is tailored to the unique needs of our producers in Hawaii.”

PRF is designed to provide insurance coverage on perennial forage acres. The program uses a rainfall index to determine precipitation for coverage purposes and does not measure production or product loss.

The PRF Hawaii program will use Hawaii Climate Data Portal information and will utilize a five-kilometer by five-kilometer grid. The program will also use a new county base value methodology due to minimal hay production on the island and limited data on grazing lease rates of the Hawaiian cattle industry.

Pasture, rangeland, and forage covers approximately 55% of U.S. land. Forage grows differently in various areas, so farmers and ranchers need to know which types and techniques work best in their region. The program helps protect a producer's operation from forage loss risks due to the lack of precipitation. It does not insure against ongoing or severe drought, as the coverage is based on expected precipitation during specific intervals.

Similar to PRF in the contiguous 48 states, producers on Hawaii's Big Island must select at least two and up to six intervals to insure their acres.

To find additional information about the policy, including policy documents, a PRF decision tool, and fact sheet, please visit the [PRF-Hawaii webpage](#).

### **More Information**

Crop insurance is sold and delivered solely through private crop insurance agents. A list of crop insurance agents is available at all USDA Service Centers and online at the [RMA Agent Locator](#). Learn more about crop insurance and the modern farm safety net at [rma.usda.gov](http://rma.usda.gov) or by contacting your [RMA Regional Office](#).

RMA secures the future of agriculture by providing world class risk management tools to rural America through Federal crop insurance and risk management education programs. RMA provides policies for more than 130 crops and is constantly working to adjust and create new policies based on producer needs and feedback.

USDA touches the lives of all Americans each day in so many positive ways. Under the Biden-Harris administration, USDA is transforming America's food system with a greater focus on more resilient local and regional food production, fairer markets for all producers, ensuring access to safe, healthy and nutritious food in all communities, building new markets and streams of income for farmers and producers using climate smart food and forestry practices, making historic investments in infrastructure and clean energy capabilities in rural America, and

committing to equity across the Department by removing systemic barriers and building a workforce more representative of America. To learn more, visit [usda.gov](https://usda.gov).
