Section III: Input Price Definitions

(1) Projected input price –

- (a) For diesel and interest, the pre- harvest year's average daily settlement price for the projected input price discovery period for the harvest year's futures contract, as shown in the following table, rounded to the nearest whole cent or the nearest tenth of a percent for the interest rate. Interest is assessed for a period of six months. The projected input price will be released no later than three business days following the end of the projected input price discovery period.
- (b) For urea and MAP, the simple average price measured in US dollars per ton for delivery in New Orleans in May of the following year published by CME, during the time period in the following tables. The projected input price for urea and MAP will be released on the same date as the projected input prices for diesel and interest. The daily projected fertilizer prices are available at <http://www.cmegroup.com/trading/agricultural/fertilizer-swap-futures.html>.
- (c) For potash, the simple average price of the reported average potash price measured in US dollars per ton as reported by the USDA-IL AMS market news during the time period in the following tables. If only one report is available in the period stipulated in these provisions, the report released most proximate to the discovery start date will be used in addition to the report that fell within the period. The report is available at http://www.ams.usda.gov/mnreports/gx_gr210.txt. The projected input price for potash will be released on the same date as the projected input prices for diesel and interest.
