DRY BEAN LOSS ADJUSTMENT STANDARDS HANDBOOK

2017 and Succeeding Crop Years

**RISK MANAGEMENT AGENCY
KANSAS CITY, MO 64133**

TITLE: DRY BEAN LOSS ADJUSTMENT STANDARDS HANDBOOK	NUMBER: 25110
EFFECTIVE DATE: 2017 and Succeeding Crop Years	ISSUE DATE: January 13, 2017
SUBJECT: Provides the procedures and instructions for administering the Dry Bean crop insurance program	OPI: Product Administration and Standards Division
	APPROVED: <i>/s/Richard H. Flourmoy</i> Deputy Administrator for Product Management

REASON FOR ISSUANCE

Major changes: See changes or additions in text which have been highlighted. Three stars (***) identify information that has been removed.

1. Revised the handbook to incorporate the most recent RMA loss adjustment handbook format and standard language. Many paragraphs and sections within the handbook were rewritten or relocated to increase clarity and understanding. Throughout the handbook, references were revised to reflect the new handbook format, removal and rearrangement of various sections and tables. Throughout the amended pages, changes were made to correct spelling, punctuation, formatting and to correct subparagraph and section numbering.
2. Reformatted the handbook into Parts, paragraphs, subparagraphs, sections, subsections and exhibits in accordance with the new handbook standards format.
3. Subparagraph 34 B(4) and (5): Clarified that the applicable Beans/Plant Factor is for the appropriate type and practice from exhibit 7.
4. Exhibit 2: Added the policy definitions for “Local Market Price” and “Net Price.”
5. Exhibit 3, Appraisal example: Added a note to the Narrative to clarify the acreage in field A is irrigated.
6. Exhibit 4, item 30: Revised statement “Refer to the LAM regarding “WOC” and short-rated acreage” by removing “and short-rated acreage” as it is not applicable to dry beans.
7. Exhibit 4, item 40 – b. (3): Added procedure to refer to subparagraph 13(3) if, due to insured causes, a Federal or State agency has ordered the appraised crop or production to be destroyed.

FILING INSTRUCTIONS

This handbook replaces the 2012 Dry Bean Loss Adjustment Standards Handbook, FCIC-25110-2H (02-2012). This handbook is effective for the 2017 and succeeding crop years and is not retroactive to any 2016 or prior crop year determinations.

PART 1 GENERAL INFORMATION AND RESPONSIBILITIES

1 General Information

A. Purpose and Objective

The RMA-issued loss adjustment standards for this crop are the official standard requirements for adjusting losses in a uniform and timely manner. The RMA issued standards for this crop and crop year are in effect as of the signature date for this crop handbook located at www.rma.usda.gov/handbooks/25000/index.html.

This handbook remains in effect until superseded by reissuance of either the entire handbook or selected portions (through amendments, bulletins, or FADs). If amendments are issued for a handbook, the original handbook as amended shall constitute the handbook. A bulletin or FAD can supersede either the original handbook or subsequent amendments.

B. Related Handbooks

The following table identifies handbooks that shall be used in conjunction with this handbook.

Handbook	Relation/Purpose
CIH	Provides overall general underwriting (not crop specific) process.
DSSH	Provides the form standards and procedures for use in the sales and service of crop insurance contracts.
GSH	Provides general crop insurance information.
LAM	Provides overall general loss adjustment (not crop-specific) process.

- (1) Terms, abbreviations, and definitions general (not crop specific) to loss adjustment are identified in the GSH.
- (2) Terms, abbreviations, and definitions specific to Dry Bean loss adjustment and this handbook are in exhibits 1 and 2, herein.

C. CAT Coverage

Refer to the CIH, GSH and LAM for provisions and procedures not applicable to CAT coverage.

2 AIP Responsibilities

A. Utilization of Standards

All AIPs shall utilize these standards for both loss adjustment and loss training for the applicable crop year. These standards, which include crop appraisal methods, claims completion instructions, and form standards, supplement the general (not crop-specific) loss adjustment standards identified in the LAM.

B. Form Distribution

The following is the minimum distribution of forms completed by the adjuster and signed by the insured (or the insured's authorized representative) for the loss adjustment inspection.

- (1) One legible copy to the insured; and
- (2) The original and all remaining copies as instructed by the AIP.

C. Record Retention

It is the AIPs responsibility to maintain records (documents) as stated in the SRA and described in the LAM.

D. Form Standards

- (1) The entry items in exhibits 3 - 4 are the minimum requirements for the Appraisal Worksheets and the PW. All entry items are "Substantive" (they are required).
- (2) The Privacy Act and Non-Discrimination statements are required statements that must be printed on the form or provided to the insured as a separate document. These statements are not shown on the example form(s) in exhibits 3 - 4. The current Non-Discrimination Statement and Privacy Act Statement can be found on the RMA website at: <http://www.rma.usda.gov/regs/required.html> or successor website.
- (3) The certification statement required by the current DSSH must be included on the PW directly above the insured's signature block immediately followed by the statement below:

"I understand the certified information on this Production Worksheet will be used to determine my loss, if any, to the above unit. The insurance provider may audit and approve this information and supporting documentation. The Federal Crop Insurance Corporation, an agency of the United States, subsidizes and reinsures this crop insurance."

- (4) Refer to the DSSH for other crop insurance form requirements (such as size of font). The current DSSH can be found on the RMA website at: <http://www.rma.usda.gov/handbooks/24000/index.html> or successor website.

3-10 (Reserved)

PART 2 POLICY INFORMATION

The AIP determines the insured has complied with all policy provisions of the insurance contract. The Dry Bean CP, which are to be considered in this determination include (but are not limited to):

11 Insurability

The following may not be a complete list of insurability requirements. Refer to the BP, CP, and SP for a complete list.

- (1) The crop insured will be all the beans in the county for which a premium rate is provided by the actuarial documents **or by WA**:
 - (a) In which the insured has a share;
 - (b) That are planted for harvest as:
 - (i) Dry beans; or
 - (ii) If applicable, contract seed beans, if the seed bean processor contract is executed on or before the acreage reporting date; and
 - (c) That are not (unless allowed in the SP or by **WA**):
 - (i) Interplanted with another crop; or
 - (ii) Planted into an established grass or legume.
- (2) For contract seed beans only:
 - (a) Dry bean acreage planted for the purpose of seed production that is under contract with a seed company (the contract does meet the requirement for insurability), the contract was executed on or before the acreage reporting date and is reported as contract seed on the acreage report, will be insured as contract seed. If the terms of the seed contract do not meet the requirement for insurability, the acreage may only be insured as dry beans.
 - (b) An instrument in the form of a “lease” under which the insured retains control of the acreage on which the insured crop is grown and that provides for delivery of the crop under substantially the same terms as a seed bean processor contract may be treated as a contract under which the insured has an insurable interest in the crop.
 - (c) The insured must submit a copy of the seed bean processor contract to the AIP on or before the acreage reporting date. Contract seed beans excluded from a processor contract are not insurable as contract seed. A processor contract must contain a base price or a method to determine such price based on published independent information.

11 Insurability (Continued)

- (d) Any acreage of contract seed beans produced by a seed company will not be insured.
- (e) The insured may elect to insure bean acreage grown under contract with a seed company as commercial dry beans provided it is reported as the appropriate type (not contract seed) on the acreage report. The minimum quality standards stated in the seed contract will not apply.
- (3) In addition to the types of beans designated in the SP, the AIP will insure other types by **WA** provided the requirements stated in the CP are met.
- (4) Any acreage of beans that is destroyed and replanted to a different insurable bean type will be considered insured acreage.
- (5) Beans must be initially planted in rows far enough apart to permit mechanical cultivation, unless otherwise provided by the SP, actuarial documents, or by **WA**.
- (6) Any acreage that does not meet the crop rotation requirements contained in the SP will not be insured.
- (7) Any acreage of the insured crop damaged before the final planting date, to the extent that the majority of growers in the area would normally not further care for the crop, must be replanted unless the AIP agrees that replanting is not practical. The insured will not be required to replant if it is not practical to replant to the same bean type as originally planted. Refer to **Part 3** of this handbook for replanting payment procedures.

12 Unit Division

Refer to the insurance contract for unit provisions. Unless limited by the CP or SP, a basic unit, as defined in the BP, or as defined in the CP for contract seed beans, may be divided into optional units if, for each optional unit, all the conditions stated in the applicable provisions are met.

For information on Enterprise and Whole-Farm units, refer to the LAM.

13 Replanted Acreage Unit Designation

When it is no longer practical to replant to the same contract seed bean variety or the same dry bean type (as specified in the CP) and the insured replants to a different (e.g., shorter season) dry bean type (different contract seed bean variety if initially reported as contract seed beans) and it is practical to replant to this different dry bean type (refer to the CP definition of practical to replant), the following instructions apply.

- (1) Applicability:
 - (a) Regular rules for acreage report revision apply. The applicable price election of the replanted type will be used to determine any replanting payment and to establish the premium and liability for the replanted acreage.

13 Replanted Acreage Unit Designation (Continued)

- (b) Replanted acreage liability may increase or decrease from that originally reported.
- (2) A revised acreage report must be prepared prior to the processing of a replant claim:
 - (a) When replanting results in any change in the number of insured acres and/or the bean type on all or part of the original unit, because of the probable effect on coverage, premium, and the applicable APH yield.
 - (b) If there is any change in the total number of contract seed bean acres on a unit (i.e., not all acres of the unit is replanted to contract seed beans).
 - (c) Basic units, originally reported on the acreage report, may be divided into optional units provided all guidelines are met.
- (3) When a replanted dry bean type differs from the original planting (dry bean type or contract seed bean variety), the acreage may qualify as a separate optional unit if:
 - (a) No other unit exists for that particular dry bean type or for contract seed beans; and
 - (b) Optional units are in effect (acreage qualifies for optional units and the acreage report and premium reflect such election).
- (4) When all of the unit acreage is replanted:
 - (a) Continue to use the original unit number (no revised acreage report necessary) when all acres of the unit are replanted to:
 - (i) The same dry bean type originally planted; or
 - (ii) Any contract seed bean variety (or varieties) when originally planted to a contract seed bean variety.
 - (b) Use a different unit number on a revised acreage report (a new number, or the unit number of an existing unit the replanted acreage will be combined with, as applicable) for:
 - (i) Any acreage within a commercial dry bean unit that is replanted to a different dry bean type than the original planting; and/or
 - (ii) Any acreage within a contract seed bean unit that is replanted to a commercial dry bean type. Acreage replanted to any contract seed bean variety will retain the original unit number.

13 Replanted Acreage Unit Designation (Continued)

- (5) When part of a unit is replanted:
- (a) Use the same (original) unit number for the part of the unit replanted to:
 - (i) The same dry bean type as the original planting; or
 - (ii) Any variety of contract seed bean (or varieties) when that part of the unit was originally planted to a contract seed bean variety (or varieties).
 - (b) Use a different unit number on a revised acreage report (a new number, or the unit number of an existing unit the replanted acreage will be combined with, as applicable) when part of the unit is replanted to:
 - (i) A different dry bean type than the remaining original planting of a dry bean type; or,
 - (ii) Any dry bean type when the original planting was a contract seed bean variety (or varieties) or vice versa.
- (6) If the replanted acreage of the dry bean type or contract seed beans does NOT qualify as a separate unit, the acreage must be combined into an existing unit of the same type or variety. A revised acreage report is necessary in either case.

Example:

On the original acreage report,

Unit 0001-0001 – 50.0 acres of pinto beans.

Unit 0001-0002 – 25.0 acres of pinto beans.

Unit 0001-0001 is damaged and replanted.

If for unit 0001-0001, 25.0 acres were replanted to pinto beans, and 25.0 acres were replanted to great northern beans, the acreage replanted back to pinto beans will retain the original unit number 0001-0001. The 25.0 acres replanted to great northern beans will be assigned a new unit number of 0001-0003.

14 Dry Bean Quality Adjustment

Mature dry bean production to count may be adjusted for excess moisture and quality deficiencies. If moisture adjustment is applicable, it will be made prior to applying any qualifying adjustment for quality. Adjustment for excess moisture or quality deficiencies, as shown below, will not be applicable to contract seed beans.

Reminder: When delivering samples to authorized graders, note on the request form, “Samples Submitted for Crop Insurance Purposes.” U.S. Grades for Dry Beans are representative of product that has had dockage removed. For other than crop insurance purposes, Grade determinations are not routinely performed on field run dry bean material.

14 Dry Bean Quality Adjustment (Continued)

GIPSA has issued special instructions for grading samples of field run dry beans for crop insurance purposes. The “Remarks” section of the Grade Certificate should state what the field run sample would have graded after the removal of dockage. If it does not, the sample will need to be resubmitted, placing an emphasis on “after dockage is removed.”

- (1) Production will be eligible for **QA** if:
 - (a) Deficiencies in quality (due to insurable causes of loss), in accordance with the United States Standards for Beans, result in dry beans not meeting the grade requirements for U.S. No. 2 (grades U.S. No. 3 or worse) because the dry beans are damaged or badly damaged; or
 - (b) Substances or conditions are present that are identified by the Food and Drug Administration or other public health organizations of the United States as being injurious to human or animal health.
 - (i) Refer to the LAM when the edible portion of the crop has been exposed to flood waters and a Federal or State agency recommends destruction or disposal of production from such acreage.
 - (ii) Under section 15(j) of the BP, if due to insured causes, a Federal or State agency has ordered the appraised insured crop or production to be destroyed, refer to the LAM. Enter the factor “.000” on the PW in column 35 for appraised production or column 65 for harvested production, as applicable. Instruct the insured to complete and submit a Certification Form stating the date the crop or production was destroyed and the method of destruction (refer to item 40 and the Narrative in exhibit 4). Also refer to the LAM for additional information. Otherwise, make no entry.
- (2) Quality will be a factor in determining the insured’s loss only if:
 - (a) The deficiencies, substances, or conditions resulted from an insurable cause of loss that occurs within the insurance period;
 - (b) The deficiencies, substances, or conditions result in a net price for the damaged production that is less than the **LMP**;
 - (c) All determinations of these deficiencies, substances, or conditions are made using samples of the production obtained by the AIP representative or by a disinterested third party approved by the AIP;
 - (d) The **QAF** cannot be greater than 1.000 or less than zero (.000). Refer to the LAM for information on speculative type **contract and QA**.
- (3) Refer to the CP and the LAM for instructions on who can obtain samples for grading and who can make determinations of deficiencies, conditions and substances that would cause the crop to qualify for **QA**. The loss adjuster may determine test weight for **QA** purposes.

14 Dry Bean Quality Adjustment (Continued)

- (4) Dry bean production that is eligible for **QA**, as specified in the CP, will be reduced as follows:
- (a) The market price of the qualifying damaged production and the **LMP** will be determined on the earlier of the date such quality adjusted production is sold or the date of final inspection for the unit.
 - (b) If a **LMP** is not available for the insured crop year, the current year's maximum price election available for the applicable type will be used. The price for the qualifying damaged production will be the market price for the local area to the extent feasible.
 - (c) The AIP may obtain prices from any buyer of their choice. If the AIP obtains prices from one or more buyers located outside the insured's local market area, the AIP will reduce such prices by the additional costs required to deliver the dry beans. Discounts used to establish the Net Price per pound of the damaged production will be limited to those that are usual, customary, and reasonable.
 - (d) The Net Price per pound will be the greater of (i) or (ii), below. For mature unharvested production and/or stored production that qualifies for **QA**, determine the pounds of the potential/stored production, and obtain a bid price as instructed below. Bid prices obtained from local markets must be based on representative samples of the damaged production that have been analyzed by a grader licensed to grade dry beans. Refer to the LAM.
 - (i) For production where the buyer/processor records gross weights and indicates the specific percentages and/or discounts for qualifying damage:
 - (A) Determine the gross weight of the production (at the quantity and quality/grade) as delivered to the buyer/processor.
 - (B) Multiply the gross weight determined in **(i)(A)** above, by the moisture adjustment factor (refer to **exhibit 8** when moisture is above 18%) and/or the dockage factor (as applicable for FM only), if applicable. The result is the adjusted production.
 - (C) If the percent of damage determined by the buyer/processor includes discounts for moisture or damage from uninsured causes, these amounts must be calculated and deducted from the stated percent of damage.
 - (D) Determine the total value that the buyer/processor paid, or would have paid, for the qualifying damaged production. If the price paid or bid price from the buyer/processor includes discounts for moisture and/or damage from uninsured causes, these amounts must be calculated and added to the price paid for the damaged production.

14 Dry Bean Quality Adjustment (Continued)

The price of the damaged production will not be reduced for:

- 1 Moisture content;
 - 2 Damage due to uninsured causes; or
 - 3 Drying, handling, processing, including trading tare for grade to obtain a higher grade and price, or any other costs associated with normal harvesting, handling, and marketing of the dry beans; except, if the price of the damaged production can be increased by conditioning, the AIP may reduce the price of the production after it has been conditioned, by the cost of conditioning but not lower than the value of the production before conditioning;
- (E) Divide the total value of the damaged production in (i)(D) above, by the adjusted production in (i)(B) above. The result is the net price per pound of the damaged production.
- (ii) The elevator may clean/screen (recondition) gross production to improve the grade of the dry beans and reflect the value of the damaged production through a weight reduction (tare %) rather than quoting a grade and price for the gross production as delivered. Refer to exhibit 9.

In this case, to determine the Net Price per pound of the qualifying damaged production:

- (A) Multiply the net weight (determined gross weight minus the weight reduction [tare %] for damage) of the production that the buyer/processor used as the basis for payment, by the price that was paid for the dry beans (the bid price of the grade of the damaged production after milling); and
- (B) Divide the result obtained in (ii)(A), above, by the gross pounds determined.

The adjuster must verify that any weight reduction is related to an insurable cause of loss. Refer to 14(4)(d)(i)(D).

- (C) The market price per pound of the damaged or conditioned production will be divided by the LMP to determine the QAF; and
- (D) The number of pounds remaining, after any reduction due to excessive moisture (the moisture-adjusted gross pounds if appropriate), of the damaged or conditioned production will then be multiplied by the QAF to determine the net production to count.

14 Dry Bean Quality Adjustment (Continued)

Example: Elevator/buyer-listed deductions may include foreign material, off-sized beans, splits, moisture dock, “dockage,” checked skins, and damage. (Refer to exhibit 4 (item 58a.), and exhibit 9.) Since moisture is handled as a separate adjustment, allowing “moisture dock” would be inappropriate. Likewise, “splits” due to uninsured causes (included in dockage) must not be included in QA.

15-20 (Reserved)

PART 3 REPLANTING PAYMENT PROCEDURES

21 Replanting Payment Procedures

- (1) Replanting payments made on acreage replanted by a practice that was uninsurable as an original planting will require the deduction of the replanting payment for such acreage from the original unit liability. If the unit dollar loss (final claim) is less than the original unit liability minus such replanting payment, the actual indemnity dollar amount will not be affected by the replanting payment. The premium will not be reduced.
- (2) No replanting payment will be made on acreage on which a prior replanting payment has been made during the current crop year.

22 Qualifications for Replanting Payment

- (1) To qualify for replanting payment, the:
 - (a) insured crop must be damaged by an insurable cause;
 - (b) AIP must determine that it is practical to replant;
 - (c) acres being replanted must have been initially planted on or after the “Earliest Planting” date established by the SP;
 - (d) per acre appraisal (plus any appraisals for uninsured causes of loss) must be less than 90 percent of the per acre production guarantee for the acreage the insured intends to replant (Refer to **Part 4, “Appraisals”**);
 - (e) acreage replanted must be at least the lesser of 20 acres or 20 percent of the insured planted acreage for the unit as determined on the final planting date or within the late planting period if a late planting period is applicable (Any acreage planted after the end of the late planting period will not be included when determining if the 20 acres or 20 percent qualification is met. Refer to the LAM.); and
 - (f) AIP must have given consent to replant.
- (2) In the Narrative of the **PW** or on a Special Report, for each field or subfield, document that qualifications for a replanting payment have been met.

23 Maximum Replanting Payment

The maximum amount of the replanting payment per acre will be the lesser of:

- (1) The insured’s actual replanting cost;
- (2) The product of multiplying the maximum pounds allowed in the CP (120 pounds) by the insured’s price election for the type to be replanted, times the insured’s share in the crop; or

23 Maximum Replanting Payment (Continued)

- (3) 10 percent of the production guarantee for the replanted type **multiplied by the** applicable price election times the insured's share.

Compute the number of pounds per acre allowed for a replanting payment by dividing the maximum replanting payment by the price election. Show all calculations in the Narrative of **the PW** or on a Special Report.

Example 1:

Owner/operator (100 percent share)
30 acres of Great Northern beans replanted
Insured's actual cost to replant = \$25.00
Price election = \$.25
10% of prod. guar. (1,125 lbs. x 10%) = 113 lbs. x \$.25 (price election) = \$28.25 x 1.000 (share) = \$28.25.
120 lbs. (maximum lbs. allowed in policy) x \$.25 (price election) = \$30.00 x 1.000 (share) = \$30.00.
The lesser of \$25.00, \$28.25 and \$30.00 is \$25.00.
Actual pounds per acre allowed = 100 lbs. ($\$25.00 \div \0.25)

Enter 100 lbs. in Section I column 31, "Appraised Potential," of the **PW**. Enter the replant calculations in the Narrative of the **PW**.

Example 2:

Landlord/tenant on 50/50 share
30 acres of Great Northern beans replanted
Insured's actual cost to replant = \$12.50
Price election = \$.25
10% of prod. guar. (1,125 lbs. x 10%) = 113 lb. x \$.25 (price election) = \$28.25 x .500 (share) = \$14.13
120 lbs. (max. lbs. allowed in policy) x \$.25 (price election) = \$30.00 x .500 (share) = \$15.00
The lesser of \$12.50, \$14.13 and \$15.00 is \$12.50.
Actual pounds per acre allowed = 50 lbs. ($\$12.50 \div \0.25)

Enter 50 lbs. in Section I column 31, "Appraised Potential," of the **PW** if the insured's share has been applied or 100 lbs. if the insured's share has yet to be applied. Indicate in the Narrative if "Appraised Potential" has/has not been reduced for share on the **PW** according to individual AIP guidelines. Enter the replant calculations in the Narrative of the **PW**.

24 Replanting Payment Inspections

Replanting payment inspections are to be prepared as final inspections on the **PW** only when qualifying for a replanting payment. Non-qualifying replanting payment inspections (unless the claim is withdrawn by the insured) are to be handled as preliminary inspections. If qualified for a replanting payment, a Certification Form may be prepared on the initial farm visit. Refer to the LAM.

25-30 (Reserved)

PART 4 APPRAISALS

31 General Information

- (1) Potential production for all types of inspections will be appraised in accordance with procedures specified in this handbook and the LAM.
- (2) Use the Before-Podding or After-Podding appraisal method instructions to appraise dry beans and contract seed beans.
- (3) The appraisal procedures used for dry beans and contract seed beans are identical, only the factors differ.

32 Selecting Representative Samples

- (1) Determine the minimum number of required samples for a field or subfield by the field size, (take not less than the minimum number (count) of representative samples required in **exhibit 5** for each field or subfield), the average stage of growth, age (size) and general capabilities of the plants, and variability of potential production and plant damage within the field or subfield.
- (2) Split the field into subfields when:
 - (a) Variable damage causes the crop potential to appear to be significantly different within the same field; or
 - (b) The insured wishes to destroy a portion of a field.
- (3) Each field or subfield must be appraised separately.

33 Measuring Row Width for Sample Selection

Use these instructions for all appraisal methods that require row width determinations.

- (1) Use a measuring tape marked in inches or convert a tape marked in tenths of a foot, to inches, to measure row width (Refer to the LAM for conversion table).
- (2) Measure across three or more row spaces, from the center of the first row to the center of the fourth row (or as many rows as needed), and divide the result by the number of row spaces measured across, to determine an average row width in whole inches.

33 Measuring Row Width for Sample Selection (Continued)

Example:

- (3) Where rows are skipped for tractor and planter tires, refer to the LAM.
- (4) Apply average row width in **exhibit 6** to determine the square foot factor.

34 Appraisals Methods

A. General Information

These instructions provide information on appraisal methods for:

Appraisal Method...	Growth Stage	Use...
Before-Podding Appraisal Method	Vegetative	For planted acreage with no emerged plants, and from plant emergence to the time bean pods are formed (seeds are not discernable by feel).
After-Podding Appraisal Method	Reproductive	From the time the bean pods have formed (seeds are discernable by feel) through maturity.

B. Before-Podding Appraisal Method

- (1) Determine the number of live plants in the 10 ft. sample row.
 - (a) Count all live plants in the 10 ft. sample row. If the sample contains both damaged and undamaged plants, convert damaged plants to an equivalent number of undamaged plants considering stage of development, degree of damage, and other factors which may affect productive potential relative to normal plants (e.g., three damaged plants may be equivalent to one undamaged plant). The conversion to equivalent undamaged plants shall be made with expectations of favorable weather through harvest.

B. Before-Podding Appraisal Method (continued)

- (b) If the reduction in stand is solely due to non-emerged plants due to insufficient soil moisture, do not complete appraisals prior to the time specified in the LAM. Refer to the paragraph in the LAM regarding deferred appraisals and non-emerged plants.
- (2) Total the number of live plants from each sample, and divide by the number of samples to determine the average number of live plants per sample.
- (3) Divide the average number of live plants per sample by the Square Foot Factor for the row spacing (from exhibit 6) to determine the average number of plants per square foot.
- (4) Multiplying the average number of plants per square foot by the average number of expected seeds per plant (from exhibit 7, Beans/Plant Factor) for the bean type and practice to determine the expected number of seeds per square foot.
- (5) Divide the expected number of seeds per square foot by the appropriate (dry bean or contract seed bean) yield factor for the bean type and practice (from exhibit 7) and round to the nearest whole pound to determine the appraised pounds per acre.

C. After-Podding Appraisal Method

- (1) Count the number of live plants in the 10 ft. sample row.
- (2) Select five representative plants from the 10 ft. sample row. Calculate the average number of pods per plant by counting the pods on the selected plants and dividing that number by five. If there are less than five representative plants in the 10 ft. sample row, count and average the number of pods per plant from all plants.
- (3) Count the number of sound, whole beans in the pods examined in step (2), above, and divide by the number of pods examined to determine the average number of beans per pod. Regardless of QA being necessary or not, count the entire harvestable amount of beans (damaged and undamaged). If QA is necessary, perform the QA process by comparing the actual value of damaged beans with the LMP for beans of the same type and variety.
- (4) Multiply the number of plants per 10 ft. sample row by the average number of pods per plant, times the average number of beans per pod to determine the average number of beans per 10 ft. sample row.
- (5) Add the average number of beans per 10 ft. sample row for each sample taken. The sum will be the Sample Total.

34 Appraisals Methods (Continued)

C. After Podding Appraisal Method (continued)

- (6) Divide the Sample Total by the number of samples taken. The result is the total average number of beans per 10 ft. sample row.
- (7) Divide the total average number of beans per 10 ft. sample row by the Square Foot Factor for the row spacing from **exhibit 6** to determine the average number of beans per square foot.
- (8) Divide the average number of beans per square foot by the yield factor for the bean type from **exhibit 7** to determine the number of pounds per acre.

35 Deviations and Modifications

- (1) Deviations in appraisal methods require **RMA** written authorization (as described in the LAM) prior to implementation.
- (2) There are no pre-established appraisal modifications or deviations contained in this handbook. Refer to the LAM for additional information.

36 General Information for Appraisal Worksheet Entries and Completion Procedures

- (1) Include the AIP's name in the appraisal worksheet title if not preprinted on the AIP's worksheet, **or** when a worksheet entry is not provided.
- (2) Include the claim number on the appraisal worksheet (when required by the AIP), when a worksheet entry is not provided.
- (3) Separate appraisal worksheets are required for each unit appraised, and for each field or subfield which has a differing base (APH) yield or farming practice (applicable to replant, preliminary, and final claims). Refer to paragraph 35 "Appraisal Methods" for sampling requirements.
- (4) Standard appraisal worksheet items are numbered consecutively in exhibit 3. An example appraisal worksheet is also provided to illustrate how to complete entries.
- (5) For all zero appraisals, refer to the LAM.

37-50 (Reserved)

PART 5 PRODUCTION WORKSHEET

51 General Information for Production Worksheet Entries and Completion Procedures

- (1) The PW is a progressive form containing all notices of damage for all preliminary, replant, and final inspections, including “No Indemnity Due” claims, on a unit.
- (2) If a PW has been prepared on a prior inspection, verify each entry and enter additional information as needed. If a change or correction is necessary, strike out all entries on the line and re-enter correct entries on a new line. The adjuster and insured should initial any line deletions.
- (3) Refer to the LAM for instructions regarding the following:
 - (a) Acreage report errors.
 - (b) Delayed notices and delayed claims.
 - (c) Corrected claims or fire losses (double coverage) and cases involving uninsured causes of loss, unusual situations, controversial claims, concealment, or misrepresentation.
 - (d) Claims involving a Certification Form (when all the acreage on the unit has been appraised to be put to another use, when acreage is being appraised for a replanting payment and all acreage on the unit has been initially planted, or other reasons described in the LAM).
 - (e) “No Indemnity Due” claims (which must be verified by an appraisal or notification from the insured that the production exceeded the guarantee).
 - (f) Late planting.
- (4) Refer to the **PPSH** for information on prevented planting.
- (5) The adjuster is responsible for determining if any of the insured’s requirements under the notice and claim provisions of the policy have not been met. If any have not, the adjuster should contact the AIP.
- (6) Instructions labeled “Preliminary” apply to preliminary inspections only. Instructions labeled “Replant” apply to replant inspections only. Instructions labeled “Final” apply to final inspections only. Instructions not labeled apply to ALL inspections.
- (7) Items labeled “**Dry Beans**” apply to inspections of dry beans only.
- (8) Items labeled “**Contract Seed Beans**” apply to inspections of contract seed bean varieties only.
- (9) Items not labeled apply to both dry bean and contract seed bean inspections.

**51 General Information for Production Worksheet Entries and Completion Procedures
(Continued)**

- (10) The AIP may complete a separate PW for each type planted in the unit.
- (11) If the AIP determines the claim is to be denied, refer to the LAM for PW completion instructions.

Acronyms and Abbreviations

The following table provides the acronyms and abbreviations used in this handbook.

Approved Acronym/Abbreviation	Term
AIP	Approved Insurance Provider
APH	Actual Production History
BP	Basic Provisions
CAT	Catastrophic Risk Protection
CIH	Crop Insurance Handbook
CP	Crop Provisions
DF	Discount Factor
DSSH	Document and Supplemental Standards Handbook
FCIC	Federal Crop Insurance Corporation
FGIS	Federal Grain Inspection Service
FSA	Farm Service Agency
GSH	General Standards Handbook
GPS	Global Positioning System
LAM	Loss Adjustment Manual
LMP	Local Market Price
PPSH	Prevented Planting Standards Handbook
PW	Production Worksheet
QA	Quality Adjustment
QAF	Quality Adjustment Factor
RIV	Reduction in Value
RMA	Risk Management Agency
SP	Special Provisions
WA	Written Agreement

Definitions

Beans (From the United States Standards for Beans) means dry threshed field and garden beans, whole, broke, and split, commonly used for edible purposes. (From the CP) Dry beans and contract seed beans.

Clean Seed Equivalent means appraised or harvested production of Contract Seed Beans which meets the minimum quality requirements contained in the seed bean processor contract. Production that does not meet the minimum quality requirements contained in the contract due to uninsured causes will be considered production to count regardless of quality.

Damaged Beans (From the United States Standards for Beans) means beans and pieces of beans that are damaged by frost, weather, disease, weevils or other insects, or other causes.

Badly Damaged Beans (From the United States Standards for Beans) means beans and pieces of beans that are materially damaged or discolored by frost, weather, disease, weevils or other insects, or other causes, so as to materially affect the appearance and quality of the beans.

Defects (From the United States Standards for Beans) means for the classes of Baby Lima and miscellaneous Lima beans, defects shall be damaged beans, contrasting classes, and foreign material. Defects for all other classes of beans shall be splits, damaged beans, contrasting classes, and foreign material.

Dry Beans means the crop defined by United States Standard for Beans excluding contract beans.

Foreign Material (From the United States Standards for Beans) means stones, dirt, weed seeds, cereal grains, lentils, peas, and all matter other than beans.

Harvest means combining the beans. Beans which are swathed or knifed prior to combining are not considered harvested.

Splits (From the United States Standard for Beans) means pieces of beans that are not damaged, each of which consists of three-fourths or less of the whole bean, and shall include any sound bean the halves of which are held together loosely.

Local Market Price means the cash price per hundredweight for the U.S. No. 2 grade of dry beans of the insured type offered by buyers in the area in which the insured normally markets the dry beans. Moisture content and factors not associated with grading under the United States Standards for Beans will not be considered in establishing this price.

Net price means the dollar value of dry bean production received, or that could have been received, after reductions in value due to insurable causes of loss.

Swathing or Knifing means severance of the bean plant from the ground, including the pods and beans, and placing them into windrows.

Form Standards – Appraisal Worksheet

Verify and/or make the following entries for each appraisal worksheet **item number/element**. A completed appraisal worksheet example is at the end of this exhibit. For general form standards and other general information, see subparagraph 2D and paragraph 37.

Item Number / Element	Standard
Company	Name of the AIP, if not preprinted on the worksheet (Company Name).
Claim No.	Claim number as assigned by the AIP.
1. Insured's Name	Name of the insured that identifies exactly the person (legal entity) to whom the policy is issued.
2. Contract No.:	Insured's assigned policy number.
3. Unit Number	Unit number from the Summary of Coverage after it is verified to be correct.
4. Crop	" <i>Dry Beans</i> " and the type abbreviation, or " <i>Contract Seed Beans</i> " as appropriate.
5. Crop Year	Four-digit crop year, as defined in the policy, for which the claim is filed.
PART I - BEFORE PODDING	
6. Field ID and Acres	Field or subfield identification symbol and acreage, to tenths.
7. Row Space	Row Width to nearest inch. Refer to paragraph 33 above for row width determination information.
8. No. Plants	Number of plants per 10 ft. sample row from which a normal yield can be expected under favorable growing conditions. If the sample contains damaged plants, determine by converting damaged plants to a lesser number of plants from which a normal yield can be expected (e.g., three damaged plants may be equivalent to one undamaged plant).
9. Total Plants	Total number of plants for all samples in item 8.
10. No. Samples	Enter the total number of samples taken. Refer to exhibit 5 for minimum number of samples.
11. Avg. No. Plants	Result of dividing the total number of plants (item 9) by the total number of samples (item 10), rounded to the nearest tenth.
12. Sq. Ft. Factor	Square foot factor for the row width. (Refer to exhibit 6 .)
13. Avg. Plants Per Sq. Ft.:	Result of dividing the average number of plants (item 11) by the square foot factor (item 12), rounded to the nearest hundredth.
14. Beans/Peas Per Plant Factor	Average number of seeds per plant for the type. (Refer to exhibit 7 .)
15. Beans Per Sq. Ft.	Result of multiplying the average plants per square foot (item 13) by the Beans/Peas Per Plant Factor (item 14), rounded to the nearest tenth.
16. Yield Factor	Yield factor for the type and practice . (Refer to exhibit 7 .)
17. Pounds Per Acre Appr.	Result of dividing the Beans Per Square Foot (item 15) by the yield factor for the type (item 16), rounded to the nearest whole pound.
18. Field ID and Acres	Field or subfield identification symbol and acreage, to tenths.
19. Row Space:	Row Width to nearest inch. Refer to paragraph 33 for row width determination information.

Form Standards – Appraisal Worksheet (Continued)

Item Number/ Element	Standard
Part II - After Podding	
20. Plants Per Sample Row	Number of plants per 10 ft. sample row.
21. Average Pods Per Plant	Average number of pods per plant from five representative plants from each sample. If there are less than five representative plants in the sample, refer to subparagraph 34C . Round to tenths.
22. Average Beans Per Pod	Average number of beans per pod on plants used in item 21. Round to tenths.
23. Sample Totals	<p>Product of multiplying the plants per 10 ft. sample row (item 20) by the average number of pods per plant (item 21), then multiplying the result by the average number of beans per pod (item 22) for each sample. Round to tenths after the final calculation.</p> <p>If more than 5 samples are taken for a field or subfield, use additional worksheets for items 18 through 23. Complete items 24 through 30 on the last worksheet. Items 31 through 33 should be completed on the last page.</p>
24. Total All Samples	Total of all entries in item 23.
25. No. Samples	Enter the number of samples taken.
26. Total Average Beans or Peas Per Sample	Result of dividing the total number of beans from all samples (item 24) by the number of samples (item 25), rounded to the nearest tenth.
27. Sq. Ft. Factor	Square foot factor for the row width from exhibit 6 .
28. Beans or Peas per Sq. Ft.	Result of dividing the total average beans per sample (item 26) by the square foot factor (item 27), rounded to the nearest tenth.
29. Yield Factor	Yield factor for the type from exhibit 7 .
30. Pounds Per Acre Appr.	Result of dividing the beans per square foot (item 28) by the yield factor for the type (item 29), rounded to the nearest whole pound.
31. Remarks	List any information pertinent to the appraisal (e.g., document any insured causes of loss); if a Special Report is used, so indicate
The following required entries are not illustrated on the Appraisal Worksheet example below.	
32. Insured's Signature and Date	Insured's (or insured's authorized representative's) signature and date. Before obtaining the signature, review all entries on the Appraisal Worksheet with the insured (or the insured's authorized representative), particularly explaining codes, etc., which may not be readily understood.
33. Adjuster's Code No., Signature, and Date	Signature of adjuster, code number, and date signed after the insured (or insured's authorized representative) has signed. If the appraisal is performed prior to signature date, document the date of appraisal in the Remarks section of the Appraisal Worksheet (if available); otherwise, document the appraisal date in the Narrative of the PW .
Page Number	Page numbers - (Example: Page 1 of 1, Page 1 of 2, Page 2 of 2, etc.).

This form example does not illustrate all required entry items (e.g., signature, dates, etc.). Refer to the above Appraisal Worksheet instructions for required statements and signature entries.

Form Standards - Production Worksheet

Verify and/or make the following entries for each PW item number/element. A completed PW example is at the end of this exhibit. For general form standards and other general information, see subparagraph 2D and paragraph 51.

Item Number/ Element	Standard
1. Crop/Code #	“Dry Beans” (0047)
2. Unit #	Unit number from the Summary of Coverage after it is verified to be correct.
3. Location Description	Land location that identifies the legal description, if available, and the location of the unit (e.g., section, township, and range; FSA Farm Numbers; FSA Common Land Units (CLU) and tract numbers; GPS identifications; or Grid identifications) as applicable for the crop.
4. Date(s) of Damage	First three letters of the month(s) during which the determined insured damage occurred for the inspection and cause(s) of loss listed in item 5 below. If no entry in item 5 below, make no entry. For progressive damage, enter the month that identifies when the majority of the insured damage occurred. Include the specific date where applicable as in the case of hail damage (e.g., Aug 11). Enter additional dates of damage in the extra spaces, as needed. If more space is needed, document the additional dates of damage in the Narrative (or on a Special Report). Refer to the illustration in item 6 below. If there is no insurable cause of loss, and a no indemnity due claim will be completed, make no entry.
5. Cause(s) of Damage	<p>Name of the determined insured cause(s) of damage for this crop as listed in the LAM for the date of damage listed in item 4 above. If an insured cause(s) of damage is coded as “Other,” explain in the Narrative. Enter additional causes of damage in the extra spaces, as needed. If more space is needed, document the additional determined insured causes of damage in the Narrative (or on a Special Report). Refer to the illustration in item 6 below.</p> <p>If it is evident that no indemnity is due, enter “No Indemnity Due” across the columns in item 5 (refer to the LAM for more information on no indemnity due claims).</p>
6. Insured Cause %	<p>Preliminary: Make No Entry.</p> <p>Replant and Final: Whole percent of damage for the insured cause of damage listed in item 5 above. Enter additional “Insured Cause %” in the extra spaces, as needed. If additional space is needed, enter the additional determined “Insured Cause %” in the Narrative (or on a Special Report). The total of all “Insured Cause %” including those entered in the Narrative must equal 100%.</p> <p>If there is no insurable cause of loss, and a no indemnity due claim will be completed, make no entry.</p>

Form Standards - Production Worksheet (Continued)

Item Number/ Element	Standard																
6. Insured Cause % (continued)	<p>Example entries for items 4-6 and the Narrative, reflecting entries for multiple dates of damage, the corresponding insured causes of damage and insured cause percents:</p> <table border="1" data-bbox="553 394 1442 625"> <tr> <td data-bbox="553 394 886 430">4. Date(s) of Damage</td> <td data-bbox="886 394 1068 430">MAY</td> <td data-bbox="1068 394 1234 430">JUN 30</td> <td data-bbox="1234 394 1442 430">AUG</td> </tr> <tr> <td data-bbox="553 430 886 506">5. Cause(s) of Damage</td> <td data-bbox="886 430 1068 506">Excess Moisture</td> <td data-bbox="1068 430 1234 506">Hail</td> <td data-bbox="1234 430 1442 506">Drought</td> </tr> <tr> <td data-bbox="553 506 886 548">6. Insured Cause %</td> <td data-bbox="886 506 1068 548">40</td> <td data-bbox="1068 506 1234 548">20</td> <td data-bbox="1234 506 1442 548">30</td> </tr> <tr> <td colspan="4" data-bbox="553 548 1442 625">Narrative: Additional date of damage – SEP 5; Cause of Damage – Freeze; Insured cause percent – 10%</td> </tr> </table>	4. Date(s) of Damage	MAY	JUN 30	AUG	5. Cause(s) of Damage	Excess Moisture	Hail	Drought	6. Insured Cause %	40	20	30	Narrative: Additional date of damage – SEP 5; Cause of Damage – Freeze; Insured cause percent – 10%			
4. Date(s) of Damage	MAY	JUN 30	AUG														
5. Cause(s) of Damage	Excess Moisture	Hail	Drought														
6. Insured Cause %	40	20	30														
Narrative: Additional date of damage – SEP 5; Cause of Damage – Freeze; Insured cause percent – 10%																	
7. Company/Agency	Name of company and agency servicing the contract.																
8. Name of Insured	Name of the insured that identifies exactly the person (legal entity) to whom the policy is issued.																
9. Claim #	Claim number as assigned by the AIP.																
10. Policy #	Insured’s assigned policy number.																
11. Crop Year	Four-digit crop year, as defined in the policy, for which the claim is filed.																
12. Additional Units	<p>Preliminary and Replant: Make No Entry.</p> <p>Final: Unit number(s) for all non-loss units for the crop at the time of final inspection. A non-loss unit is any unit for which a PW has not been completed. Additional non-loss units may be entered on a single PW.</p> <p>If more spaces are needed for non-loss units, enter the unit numbers, identified as “Non-Loss Units,” in the Narrative or on an attached Special Report.</p>																
13. Est. Prod. Per Acre	<p>Preliminary and Replant: Make No Entry.</p> <p>Final: Estimated yield per acre, in whole bushels, of all non-loss units for the crop at the time of final inspection.</p>																
14. Date(s) Notice of Loss	<p>Preliminary:</p> <p>a. Date the first or second notice of damage or loss was given for the unit in item 2, in the 1st or 2nd space, as applicable. Enter the complete date (MM/DD/YYYY) for each notice.</p> <p>b. A notice of damage or loss for a third preliminary inspection (if needed) requires an additional set of PWs. Enter the date of notice for a third preliminary inspection in the 1st space of item 14 on the second set of PWs.</p> <p>c. Reserve the “Final” space on the first page of the first set of PWs for the date of notice for the final inspection.</p>																

Form Standards - Production Worksheet (Continued)

Item Number/ Element	Standard
14. Date(s) Notice of Loss (continued)	<p>Preliminary:</p> <p>d. If the inspection is initiated by the AIP, enter “Company Insp.” instead of the date.</p> <p>e. If the notice does not require an inspection, document as directed in the Narrative instructions.</p> <p>Replant and Final: Transfer the last date (in the 1st or 2nd space from the first or second set of PWs) to the final space on the first page of the first set of PWs if a final inspection should be made as a result of the notice. Always enter the complete date of notice (MM/DD/YYYY) for the final inspection in the final space on the first set of PWs. For a delayed notice of loss or delayed claim, refer to the LAM.</p>
15. Companion Policy(s)	<p>a. If no other person has a share in the unit (insured has 100 percent share), make no entry.</p> <p>b. In all cases where the insured has less than a 100 percent share of a loss-affected unit, ask the insured if the other person sharing in the unit has a multiple-peril crop insurance contract (i.e., not crop-hail, fire, etc.). If the other person does not, enter “None.”</p> <p>(1) If the other person has a multiple-peril crop insurance contract and it can be determined that the same AIP services it, enter the contract number. Handle these companion policies according to AIP instructions.</p> <p>(2) If the other person has a multiple-peril crop insurance contract and a different AIP or agent services it, enter the name of the AIP and/or agent (and contract number) if known.</p> <p>(3) If unable to verify the existence of a companion contract, enter “Unknown” and contact the AIP for further instructions.</p> <p>c. Refer to the LAM for further information regarding companion contracts.</p>

Form Standards - Production Worksheet (Continued)

Section I – Determined Acreage Appraised, Production and Adjustments

Make separate line entries for varying:

- (1) Rate classes, types, classes, sub-classes, intended uses, irrigated practices, cropping practices, or organic practices, as applicable;
- (2) APH yields;
- (3) Appraisals;
- (4) Adjustments to appraised mature production (moisture and/or QAFs);
- (5) Stages or intended use(s) of acreage;
- (6) Shares (e.g., 50 percent and 75 percent shares on the same unit); or
- (7) Appraisals for damage due to hail or fire if Hail and Fire Exclusion is in effect.

Item Number/ Element	Standard
16. Field ID	<p>The field identification symbol from a sketch map or an aerial photo. Refer to the Narrative.</p> <p>Where acreage is partly replanted, omit the field ID symbol for the fields that have not been replanted and that have been consolidated into a single line entry.</p>
17. Multi-Crop Code	<p>Replant: Make No Entry.</p> <p>Preliminary and Final: The applicable two-digit code for first crop and second crop. Refer to the LAM for instructions regarding entry of first crop and second crop codes.</p>
18. Reported Acres	<p>In the event of over-reported acres, handle in accordance with the individual AIP's instructions. In the event of under-reported acres, enter the reported acres to tenths for the field or sub field. If there are no under-reported acres, make no entry.</p>
19. Determined Acres	<p>Refer to the LAM for definition of acceptable determined acres used herein. Enter the determined acres to tenths for the field or subfield for which consent is given for other use and/or:</p> <ol style="list-style-type: none"> a. Put to other use without consent; b. Abandoned; c. Damaged by uninsured causes; or d. For which the insured failed to provide acceptable records of production.

Form Standards - Production Worksheet (Continued)

Item Number / Element	Standard
19. Determined Acres (continued)	<p>Refer to the LAM for procedures regarding when estimated acres are allowed and documentation requirements.</p> <p>Replant: Determine the total acres, to tenths, of replanted acreage (do not estimate). Make a separate line entry for any part of a field not replanted.</p> <p>a. Determine the planted acreage of any fields not replanted. Consolidate it into a single line entry unless the usual reasons for separate line entries apply. Record the field identities (from a map or aerial photo) in the Narrative.</p> <p>b. Account for all planted acreage in the unit.</p> <p>Preliminary and Final: Determined acres to tenths.</p> <p>Acreage breakdowns within a unit or field may be estimated (refer to the LAM) if a determination is impractical.</p> <p>Account for all planted acreage in the unit.</p>
20. Interest or Share	Insured's interest in the crop to three decimal places as determined at the time of inspection. If shares vary on the same unit, use separate line entries.
21. Risk	<p>Three-digit code for the correct "Rate" as specified on the actuarial document maps. If a "Rate" or "High-Risk Area" is not specified on the actuarial document maps, make no entry. Verify with the Summary of Coverage and if the "Rate" is found to be incorrect, revise according to the AIP's instructions. Refer to the LAM.</p> <p>Unrated land is uninsurable without a WA.</p>
22. Type	Three-digit code number, entered exactly as specified on the actuarial documents for the type grown by the insured. If "No Type Specified" is shown in the actuarial documents, enter the appropriate three-digit code number from the actuarial documents (e.g., 997). If a type is not specified on the actuarial documents, make no entry.
23. Class	Three-digit code number, entered exactly as specified on the actuarial documents for the class grown by the insured. If "No Class Specified" is shown in the actuarial documents, enter the appropriate three-digit code number from the actuarial documents (e.g., 997). If a class is not specified on the actuarial documents, make no entry.
24. Sub-Class	Three-digit code number, entered exactly as specified on the actuarial documents for the sub-class grown by the insured. If "No Sub-Class Specified," is shown in the actuarial documents, enter the appropriate three-digit code number from the actuarial documents (e.g., 997). If a sub-class is not specified on the actuarial documents, make no entry.

Form Standards - Production Worksheet (Continued)

Item Number / Element	Standard														
25. Intended Use	Three-digit code number, entered exactly as specified on the actuarial documents for the intended use of the crop grown by the insured. If “No Intended Use Specified” is shown in the actuarial documents, enter the appropriate three-digit code number from the actuarial documents (e.g., 997). If an intended use is not specified on the actuarial documents, make no entry.														
26. Irr. Practice	Three-digit code number, entered exactly as specified on the actuarial documents for the irrigated practice carried out by the insured. If “No Irrigated Practice Specified” is shown in the actuarial documents, enter the appropriate three-digit code number from the actuarial documents (e.g., 997). If an irrigated practice is not specified on the actuarial documents, make no entry.														
27. Cropping Practice	Three-digit code number, entered exactly as specified on the actuarial documents for the cropping practice (or practice) carried out by the insured. If “No Cropping Practice” or “No Practice Specified” is shown in the actuarial documents, enter the appropriate three-digit code number from the actuarial documents (e.g., 997). If a cropping practice is not specified on the actuarial documents, make no entry.														
28. Organic Practice	Three-digit code number, entered exactly as specified on the actuarial documents for the organic practice carried out by the insured. If “No Organic Practice Specified” is shown in the actuarial documents, enter the appropriate three-digit code number from the actuarial documents (e.g., 997). If an organic practice is not specified on the actuarial documents, make no entry.														
29. Stage	<p>Preliminary: Make No Entry.</p> <p>Replant: Replant stage abbreviation as shown below.</p> <table border="0" data-bbox="521 1262 1433 1556"> <thead> <tr> <th data-bbox="521 1262 764 1297"><u>Stage</u></th> <th data-bbox="781 1262 954 1297"><u>Explanation</u></th> </tr> </thead> <tbody> <tr> <td data-bbox="521 1297 764 1367">“R”</td> <td data-bbox="781 1297 1433 1367">Acreage replanted and qualifying for replanting payment.</td> </tr> <tr> <td data-bbox="521 1367 764 1556">“NR”</td> <td data-bbox="781 1367 1433 1556">Acreage not replanted or not qualifying for a replanting payment. Enter “NR” if the combined potential production appraisal and uninsured cause appraisal totals 90 percent or more of the guarantee for replanting claims.</td> </tr> </tbody> </table> <p>Final: Stage abbreviation as shown below.</p> <table border="0" data-bbox="521 1650 1433 1936"> <thead> <tr> <th data-bbox="521 1650 764 1686"><u>Stage</u></th> <th data-bbox="781 1650 964 1686"><u>Explanation</u></th> </tr> </thead> <tbody> <tr> <td data-bbox="521 1686 764 1860">“P”</td> <td data-bbox="781 1686 1433 1860">Acreage abandoned without consent, put to other use without consent, damaged solely by uninsured causes, or for which the insured failed to provide acceptable records of production to the AIP.</td> </tr> <tr> <td data-bbox="521 1860 764 1896">“H”</td> <td data-bbox="781 1860 932 1896">Harvested.</td> </tr> <tr> <td data-bbox="521 1896 764 1936">“UH”</td> <td data-bbox="781 1896 1373 1936">Unharvested or put to other use with consent.</td> </tr> </tbody> </table>	<u>Stage</u>	<u>Explanation</u>	“R”	Acreage replanted and qualifying for replanting payment.	“NR”	Acreage not replanted or not qualifying for a replanting payment. Enter “NR” if the combined potential production appraisal and uninsured cause appraisal totals 90 percent or more of the guarantee for replanting claims.	<u>Stage</u>	<u>Explanation</u>	“P”	Acreage abandoned without consent, put to other use without consent, damaged solely by uninsured causes, or for which the insured failed to provide acceptable records of production to the AIP.	“H”	Harvested.	“UH”	Unharvested or put to other use with consent.
<u>Stage</u>	<u>Explanation</u>														
“R”	Acreage replanted and qualifying for replanting payment.														
“NR”	Acreage not replanted or not qualifying for a replanting payment. Enter “NR” if the combined potential production appraisal and uninsured cause appraisal totals 90 percent or more of the guarantee for replanting claims.														
<u>Stage</u>	<u>Explanation</u>														
“P”	Acreage abandoned without consent, put to other use without consent, damaged solely by uninsured causes, or for which the insured failed to provide acceptable records of production to the AIP.														
“H”	Harvested.														
“UH”	Unharvested or put to other use with consent.

“WOC”.....	Other use without consent																		
“SU”.....	Solely uninsured																		
“ABA”.....	Abandoned without consent																		
“H”.....	Harvested																		
“UH”.....	Unharvested																		
31. Appraised Potential	<p>Replant: Document the calculations in the Narrative and enter the amount pounds per acre for replanting, rounded to the nearest whole pound. Refer to Part 3, “Replanting Payment Procedures,” for qualifications and computations.</p> <p>Preliminary And Final:</p> <p>Dry Beans - Per-acre appraisal, in whole pounds, of potential production for the acreage appraised. Refer to paragraph 34, “Appraisal Methods” for additional instructions.</p> <p>If there is no potential on UH acreage, enter “0.”</p> <p>Contract Seed Beans - Enter the potential production as clean seed equivalent, determined as follows (show all calculations on a Special Report):</p>																		

Form Standards - Production Worksheet (Continued)

Item Number / Element	Standard
<p>31. Appraised Potential (continued)</p>	<p>a. For Immature appraised production per acre:</p> <ol style="list-style-type: none"> (1) Multiply the gross pounds per acre of immature appraised production by the seed company's historical average gradeout percentage for the variety to calculate the determined pounds of clean seed production. The remaining appraised production is the determined pounds of production that is not clean seed. (2) Convert the determined pounds of production which is not clean seed to clean seed equivalent by multiplying the pounds of such seed by a factor obtained by dividing the value of such beans by the base price (as defined in the CP). Add the resulting pounds to the determined pounds of clean seed to obtain the determined pounds of clean seed equivalent. <div style="border: 1px solid black; padding: 10px; margin: 10px 0;"> <p>Example:</p> <p>2000 lbs./acre appraisal x .80 seed company's historical grade-out percentage 1600 pounds of clean seed</p> <p>2000 lbs. - 1600 lbs. clean seed = 400 lbs. NOT clean seed</p> <p>.1500 (value/lb. not clean seed) divided by .3000 (value per lb. of clean seed) = .500 factor</p> <p>400 lbs./acre not clean seed X .500 = 200 lbs./acre clean seed equivalent</p> <p>1600 lbs. + 200 lbs. = 1800 lbs./acre of clean seed equivalent (Enter this sum in item 31)</p> </div> <p>b. For Mature appraised unharvested production per acre:</p> <ol style="list-style-type: none"> (1) Add the value of appraised clean seed production to the value of appraised production which is not clean seed (nearest whole dollar for each). (2) Divide the value of the appraised production by the base price to determine the whole pounds of clean seed equivalent.

Form Standards - Production Worksheet (Continued)

Item Number / Element	Standard
32a. Moisture %	<p>Replant: Make No Entry.</p> <p>Preliminary and Final:</p> <p>Dry Beans - For appraised mature dry bean production, enter the moisture percent (if in excess of 18.0 percent), to the nearest tenth. Moisture adjustment is applied prior to applying any qualifying adjustment for quality.</p> <p>Contract Seed Beans - Make No Entry.</p>
32b. Factor	<p>Replant: Make No Entry.</p> <p>Preliminary and Final:</p> <p>Dry Beans - Moisture factor - For appraised mature dry bean production in excess of 18.0 percent, obtain factor from exhibit 8.</p> <p>Contract Seed Beans - Make No Entry.</p>
33. Shell %, Factor, or Value	Make No Entry.
34. Production Pre QA	<p>Preliminary, Replant, and Final: Result of multiplying column 31 times column 19, and if applicable, times column 32b, to whole pounds. If no entry in column 31, Make No Entry.</p>
35. Quality Factor	<p>Replant: Make No Entry.</p> <p>Preliminary and Final:</p> <p>Dry Beans:</p> <p>When the dry beans do not grade at least U.S. No. 2 due to damaged or badly damaged beans (or as otherwise specified) from insurable causes, enter, as a 3-digit decimal factor, the result of dividing the Net Price Per Pound of the damaged production (based on the highest dollar amount per pound that could be received from a buyer) by the LMP for U.S. No. 2 dry beans of the same type. (Refer to paragraph 13 for more information.)</p> <p>Under section 15 (j) of the BP, if due to insured causes, a Federal or State agency has ordered the appraised insured crop or production to be destroyed, enter the factor “.000.” Instruct the insured to complete and submit a Certification Form stating the date the crop or production was destroyed and the method of destruction (also refer to item 40). Document the cause of condition in the Narrative and include a copy of the Certification Form. Also refer to LAM for additional information.</p> <p>Contract Seed Beans - Make No Entry.</p>

Form Standards - Production Worksheet (Continued)

Item Number / Element	Standard
36. Production Post QA	<p>Replant: Transfer the entry in item 34.</p> <p>Preliminary and Final: Result of multiplying column 34 times column 35, rounded to whole pounds. If no entry in column 35, transfer entry from column 34.</p>
37. Uninsured Cause	<p>Replant: Make No Entry.</p> <p>Preliminary and Final: Result of per acre appraisal for uninsured causes (taken from appraisal worksheet or other documentation) multiplied by column 19, rounded to whole pounds. Refer to the LAM for information on how to determine uninsured cause appraisals. If no uninsured causes, make no entry.</p> <p>a. Hail and Fire exclusion not in effect.</p> <p>(1) Enter the result of multiplying column 19 entry by not less than the insured's production guarantee per acre in whole pounds, for the line, (calculated by multiplying the elected coverage level percentage times the approved APH yield per acre shown on the APH form) for any "P" stage acreage.</p> <p>(2) On preliminary inspections, advise the insured to keep the harvested production from any acreage damaged solely by uninsured causes separate from other production.</p> <p>(3) For acreage that is damaged partly by uninsured causes, enter the result of multiplying appraised uninsured loss of production per acre in whole pounds, by column 19 entry for any such acreage.</p> <p>b. When there is late-planted acreage, the applicable per-acre production guarantee for such acreage is the production guarantee per-acre that has been reduced for late-planted acreage, multiplied by column 19 entry.</p> <p>c. Refer to the LAM when a Hail and Fire Exclusion is in effect and damage is from hail or fire.</p> <p>d. Enter the result of adding uninsured cause appraisals to hail and fire exclusion appraisals.</p> <p>e. For fire losses, if the insured also has other fire insurance (double coverage), refer to the LAM.</p>
38. Total to Count	Result of adding item 36 and item 37.
39. Total	<p>Preliminary: Make No Entry.</p> <p>Replant and Final: Total determined acres (column 19).</p>

Form Standards - Production Worksheet (Continued)

Item Number / Element	Standard													
40. Quality	<p>Replant: Make No Entry.</p> <p>Preliminary and Final: Check the applicable qualifying QA condition(s) affecting the unit’s production (refer to table below). Check all qualifying conditions that apply to the unit’s appraised and harvested production (refer to the CP and SP).</p> <table border="1" data-bbox="513 495 1459 1024"> <thead> <tr> <th data-bbox="513 495 1459 531">Qualifying QA Condition:</th> </tr> </thead> <tbody> <tr> <td data-bbox="513 531 1459 567">Test Weight (TW)</td> </tr> <tr> <td data-bbox="513 567 1459 602">Kernel Damage (KD) and Total Defects</td> </tr> <tr> <td data-bbox="513 602 1459 638">Garlicky (Grade)</td> </tr> <tr> <td data-bbox="513 638 1459 674">Aflatoxin</td> </tr> <tr> <td data-bbox="513 674 1459 709">Vomitoxin</td> </tr> <tr> <td data-bbox="513 709 1459 745">Fumonisin</td> </tr> <tr> <td data-bbox="513 745 1459 781">Dark Roast (for Sunflowers only)</td> </tr> <tr> <td data-bbox="513 781 1459 816">Sclerotinia (for Sunflowers only)</td> </tr> <tr> <td data-bbox="513 816 1459 852">Ergoty (Grade)</td> </tr> <tr> <td data-bbox="513 852 1459 888">COFO (commercially objectionable foreign odor) (includes Musty and Sour Odor)</td> </tr> <tr> <td data-bbox="513 888 1459 924">Other</td> </tr> <tr> <td data-bbox="513 924 1459 959">None</td> </tr> </tbody> </table> <p>a. For all qualifying QA conditions checked, in the Narrative (or on a Special Report):</p> <ol style="list-style-type: none"> <li data-bbox="581 1163 1474 1304">(1) Document the level for each qualifying QA condition as indicated by approved test results, and the name and location of each testing facility that verifies the presence of the qualifying QA condition and the date of the test(s); or <li data-bbox="581 1339 1419 1480">(2) Enter “See documentation included in the claim file” (e.g., include copy of the test facility certificate, grade certificate, summary or settlement sheet, etc., that documents the QA condition). <p>b. If “Other” is checked, in addition to the above documentation requirements, document in the Narrative (or on a Special Report):</p> <ol style="list-style-type: none"> <li data-bbox="581 1621 1243 1656">(1) A description of the qualifying QA condition; <li data-bbox="581 1661 1419 1759">(2) The name of the controlling authority that considers this qualifying QA condition to be injurious to human or animal health and why. <li data-bbox="581 1764 1468 1871">(3) Refer to subparagraph 13(3) if, due to insured causes, a Federal or State agency has ordered the appraised crop or production to be destroyed. <p>c. Check “None” if none of the production qualifies for QA.</p>	Qualifying QA Condition:	Test Weight (TW)	Kernel Damage (KD) and Total Defects	Garlicky (Grade)	Aflatoxin	Vomitoxin	Fumonisin	Dark Roast (for Sunflowers only)	Sclerotinia (for Sunflowers only)	Ergoty (Grade)	COFO (commercially objectionable foreign odor) (includes Musty and Sour Odor)	Other	None
Qualifying QA Condition:

COFO (commercially objectionable foreign odor) (includes Musty and Sour Odor)														
Other														
None														

Form Standards - Production Worksheet (Continued)

Item Number / Element	Standard
41. Mycotoxins exceed FDA, State, or other health organization maximum limits. Check "Yes:"	<p>Replant: Make No Entry.</p> <p>Preliminary and Final: Check "Yes" if any mycotoxins listed in item 40 (including any identified as "Other") exceed the FDA, state, or other health organization maximum limits, otherwise leave blank. Document in the Narrative (or on a Special Report), the disposition of the production that was:</p> <p>a. Sold, document the name and address of the buyer; or</p> <p>b. Not sold, document the date(s) of the disposition, how the production was used, or how it was destroyed.</p> <p>Refer to the LAM and the SP for additional information on mycotoxins.</p>
42. Totals	Total of entries in columns 34, 36, 37 and 38. If a column has no entries, make no entry.

Narrative Instructions

If more space is needed, document on a Special Report, and enter "See Special Report." Attach the Special Report to the PW.

a.	If no acreage is released on the unit, enter "No acreage released," adjuster's initials, and date.
b.	If notice of damage was given and no inspection is required, enter "No Inspection," the unit number(s), date, and adjuster's initials (do not enter unit numbers for which notice has not been given). The insured's signature is not required.
c.	Explain any uninsured causes, unusual, or controversial cases.
d.	If there is an appraisal in Section I, column 37 for uninsured causes due to a hail/fire exclusion, show the original hail/fire liability per acre and the hail/fire indemnity per acre.
e.	Document the actual appraisal date if an appraisal was performed prior to the adjuster's signature date on the appraisal worksheet, and the date of the appraisal is not recorded on the appraisal worksheet.
f.	State that there is "No other fire insurance" when fire damages or destroys the insured crop and it is determined that the insured has no other fire insurance. Also refer to the LAM.
g.	Explain any errors found on the Summary of Coverage.
h.	Explain any commingled production. Refer to the LAM.
i.	Explain any entry for "Production Not to Count" in Section II, column 62 and/or any production not included in Section II, column 56 or column 49 - 52 entries (e.g., harvested production from uninsured acreage that can be identified separately from the insured acreage in the unit).
j.	Explain a "No" checked in item 44.

Form Standards - Production Worksheet (Continued)

k.	<p>Attach a sketch map or aerial photo to identify the total unit:</p> <ol style="list-style-type: none"> (1) If consent is or has been given to put part of the unit to another use or to replant; (2) If acreage has been replanted to a practice uninsurable as an original practice; (3) If uninsured causes are present; or (4) For unusual or controversial cases. <p>Indicate on the aerial photo or sketch map, the disposition of acreage destroyed or put to other use with or without consent.</p>
l.	Explain any difference between date of inspection and signature dates. For an absentee insured, enter the date of the inspection and the date of mailing the PW for signature.
m.	When any other adjuster or supervisor accompanied the adjuster on the inspection, enter the code number of the other adjuster or supervisor and the date of inspection.
n.	Explain the reason for a “No Indemnity Due” claim. “No Indemnity Due” claims are to be distributed in accordance with the AIP’s instructions.
o.	Explain any delayed notices or delayed claims as instructed in the LAM.
p.	Document any authorized estimated acres, as instructed in the LAM, shown in Section I, column 19.
q.	Document the method and calculation used to determine acres for the unit. Refer to the LAM.
r.	Specify the type of insects or disease when the insured cause of damage or loss is listed as insects or disease. Explain why control measures did not work.
s.	Document the per-acre appraisal (plus appraisal for uninsured causes of loss, if applicable) for replanted acreage, and the calculations to show that the qualifications for a replanting payment have been met. Refer to Part 3, paragraph 22.
t.	If any acreage to be replanted in the unit does not qualify for a replanting payment, enter Field No., “Not Qual. for RP Payment,” date of inspection, adjuster’s initials, and reason not qualified.
u.	For replant claims, indicate if the pounds allowed for replanting have/have not been reduced for share on the PW according to individual AIP guidelines.
v.	<p>For production that qualifies for QA (include the following supporting documentation in the insured’s claim file):</p> <ol style="list-style-type: none"> (1) Explain any “.000” QAF entered in Section I, column 35 and Section II, column 65. (2) Explain any deficiencies, substances, or conditions that are allowed for QA, as well as any, which were not allowed. (3) If mycotoxins are present, document the level based on laboratory test results. (4) Document the DFs or the RIV’s and LMP, as applicable, used in establishing the QAF for mature appraised or harvested production. (5) Refer to the LAM for documentation requirements when any excess transportation costs or conditioning costs are included in the QAF. (6) Document all calculations used in determining QAF. (7) Refer to the LAM for additional documentation requirements. (8) If destruction is ordered by a Federal or State agency, record the date the crop was destroyed and the method of destruction. Also, attach to the claim the insured’s completed Certification Form, a copy of the destruction order issued by the Federal or State agency and (if applicable) a copy of the laboratory test results that confirms the presence of injurious substances or conditions.

Form Standards - Production Worksheet (Continued)

w.	Document field or subfield ID's, date, and method of destruction of mycotoxin-infested Dry Beans if it has no market value. For further documentation instructions, refer to the LAM.
x.	Document the name and address of the charitable organization when gleaned acreage is applicable. Refer to the LAM for more information on gleaning.
y.	Document the type of Dry Beans being appraised, if not indicated on the appraisal worksheet or on a Special Report.
z.	Document any other pertinent information, including any data to support any factors used to calculate the production.

Section II – Determined Harvested Production

- (1) Account for all harvested production (for all entities sharing in the crop) except production appraised before harvest and shown in Section I because the quantity cannot be determined later (e.g., high moisture grain going into air-tight storage, released for other uses, etc.).
- (2) Columns 49 through 52 are for structure measurement entries (Rectangular, Round, Square, Conical Pile, etc.). If structures are a combination of shapes, break into a series of average measurements, if possible. Enter “Odd Shape” if production is stored in an odd-shaped structure. Document measurements on a Special Report or other worksheet used for this purpose.
- (3) If farm-stored production has been weighed prior to storage and acceptable weight tickets are available showing gross weights, enter “Weighed and Stored on Farm” in columns 49 through 52. Refer to the LAM for acceptable weight tickets.
- (4) For production commercially stored, sold, etc., make entries in columns 49 through 52 as follows:
 - (a) Name and address of storage facility or buyer.
 - (b) “Seed,” “Fed,” etc.
- (5) There will be no “harvested production” entries for replanting payments.
- (6) If acceptable sales or weight tickets are not available, refer to the LAM.
- (7) If additional lines are necessary, the data may be entered on a continuation sheet. Use separate lines for:
 - (a) Separate storage structures.
 - (b) Varying names and addresses of buyers of sold production.
 - (c) Varying determinations of production (varying moisture, foreign material (FM), test weight, value, etc.). Average percent of FM or moisture can be entered when the elevator has calculated the average on the summary sheet, and the determined average is acceptable to the adjuster. Separate line entries are not otherwise required. Refer to the LAM for instructions.

Form Standards - Production Worksheet (Continued)

- (d) Varying shares; e.g., 50 percent and 75 percent shares on same unit.
 - (e) Conical piles. Do not add the cone in the top or bottom of a bin to the height of other grain in the structure. For computing the production in cones and conical piles, refer to the LAM.
 - (f) Varying types: e.g., a specialty Dry Bean type and commodity type Dry Bean in the same unit. If there are multiple types planted within the same unit, the AIP may complete a separate PW for each type in the unit.
- (8) There will generally be no harvested production entries in columns 47 through 66 for preliminary inspections.
- (9) If there is harvested production from more than one insured practice (or type) and a separate approved APH yield has been established for each, the harvested production also must be entered on separate lines in columns 47 through 66 by type or practice. If production has been commingled, refer to the LAM.
- (10) For mycotoxin damage, refer to the LAM for special instructions.

Item Number / Element	Standard
43. Date Harvest Completed: (Used to determine if there is a delayed notice or a delayed claim. Refer to the LAM.)	<p>Preliminary: Make No Entry.</p> <p>Replant and Final:</p> <ul style="list-style-type: none"> a. The earlier of the date the entire acreage on the unit was (1) harvested, (2) totally destroyed, (3) replanted, (4) put to other use, (5) a combination of harvested, destroyed, or put to other use, or (6) the calendar date for the end of the insurance period. b. If at the time of final inspection (if prior to the end of the insurance period), there is any unharvested insured acreage remaining on the unit that the insured does not intend to harvest; enter “Incomplete.” c. If at the time of final inspection (if prior to the end of the insurance period), none of the insured acreage on the unit has been harvested, and the insured does not intend to harvest such acreage, enter “No Harvest.” d. If the case involves a Certification Form, enter the date from the Certification Form when the entire unit is put to another use, replanting is complete for the unit, etc. Refer to the LAM.
44. Damage similar to other farms in the area?	<p>Preliminary: Make No Entry.</p> <p>Replant and Final: Check “Yes” or “No.” Check “Yes” if the amount and cause of damage due to insurable causes is similar to the experience of other farms in the area. If “No” is checked, explain in the Narrative.</p>

Form Standards - Production Worksheet (Continued)

Item Number / Element	Standard
45. Assignment of Indemnity	Check "Yes" only if an assignment of indemnity is in effect for the crop year; otherwise, check "No." Refer to the LAM.
46. Transfer of Right to Indemnity	Check "Yes" only if a transfer of right to indemnity is in effect for the unit for the crop year; otherwise, check "No." Refer to the LAM.
47a. Share	Record only varying shares on same unit to three decimal places.
47b. Field ID	<p>a. If only one practice and/or type of harvested production is listed in Section I, make no entry.</p> <p>b. If more than one practice and/or type of harvested production is listed in Section I, and a separate approved APH yield exists, indicate for each practice/type the corresponding Field ID (from Section I, column 16).</p>
48. Multi-Crop Code	The applicable two-digit code for first crop and second crop. Refer to the LAM for instructions regarding entry of first crop and second crop codes.
49. Length or Diameter	<p>Internal measurement in feet to tenths of structural space occupied by crop.</p> <p>a. Length if rectangular or square.</p> <p>b. Diameter if round or conical pile. Refer to the LAM to convert circumference to diameter if internal diameter measurement is not possible.</p>
50. Width	Internal width measurement in feet to tenths of space occupied by crop in structure if rectangular or square. If round, enter "RND." If conical pile, enter "Cone."
51. Depth	Depth measurement in feet to tenths of space occupied by crop in rectangular, round, or square structure. If conical pile, enter the height of the cone. If there is production in the storage structure from other units or sources, refer to the LAM.
52. Deductions	Cubic feet, to tenths, of crop space displaced by chutes, vents, studs, crossties, etc. Refer to the LAM for computation instructions.
53. Net Cubic Feet	Net cubic feet of crop in the storage structure. Refer to the LAM for computation instructions.
54. Conversion Factor	Enter Conversion Factor as ".8" (only if structure measurements are entered).
55. Gross Prod.	Multiply column 53 times column 54, rounded to tenths of a bushel. The results of this calculation represent the amount of gross bushels in the bin.

Form Standards - Production Worksheet (Continued)

Item Number / Element	Standard
56. Bu., Ton, Lbs., Cwt.	<p data-bbox="542 254 964 289">Circle "Lbs." in column heading.</p> <p data-bbox="542 321 1360 390">Dry Beans - Enter the gross production in whole pounds before deductions for moisture and dockage, for production:</p> <p data-bbox="558 422 1029 457">a. Weighed and stored on the farm.</p> <p data-bbox="613 489 1464 600">For farm-stored production, calculate the pounds as follows: column 55 (gross production in bushels) times column 60a (actual test weight), rounded to the nearest whole pound.</p> <p data-bbox="558 632 1403 848">b. Sold and/or Stored in commercial storage - Obtain gross production for the unit from the summary and/or settlement sheets. (Individual load slips only will not suffice unless the storage facility or buyer will not provide summary and/or settlement sheets to the insured, and this is documented in the Narrative.)</p> <p data-bbox="558 879 1458 1020">c. Stored in odd-shaped structures. The adjuster must compute the amount of gross production. (Refer to the LAM for cubic footage and production computations). A copy of all production calculations must be left in the file folder.</p> <p data-bbox="542 1052 1435 1121">d. For mycotoxin-infected dry beans, enter all production even if it has no market value.</p> <p data-bbox="542 1161 1321 1230">Contract Seed Beans - Enter in whole pounds of clean-seed equivalent, the production as computed below:</p> <p data-bbox="542 1262 1464 1514">a. Determine the value of harvested contract seed bean production to count, by variety, on a line basis. For both clean-seed production, and production which is not clean seed, add the amount received for sold production to the dollar value of unsold production (nearest whole dollar). The value of contract seed bean production to count for each variety in the unit will be determined as follows:</p> <p data-bbox="613 1545 1464 1766">(1) For production meeting the minimum quality requirements contained in the seed bean processor contract and for production that does not meet such requirements due to uninsured causes, multiply the actual value per pound or base price per pound, whichever is greater, by the number of pounds of such production.</p> <p data-bbox="613 1797 1451 1942">(2) For production not meeting the minimum quality requirements contained in the seed bean processor contract due to insurable causes, multiply the actual value per pound by the number of pounds of such production.</p>

Form Standards - Production Worksheet (Continued)

Item Number / Element	Standard
56. Bu., Ton, Lbs., Cwt. (continued)	<p>b. Sum the results obtained in a.(1) and a.(2) above. The result is the total value of the contract seed production to count.</p> <p>c. Divide the total value of production to count by the base price to determine whole pounds of clean-seed equivalent, and enter the result.</p> <p>d. Include in the Narrative a statement which indicates the basis for pounds to count of clean-seed equivalent determined in step “c” above.</p>
57. Shell/Sugar Factor	Make No Entry.
58a. FM %	<p>Make entry to nearest tenth. Splits, in accordance with the United States Standards for Beans, are considered as beans and shall not be subtracted on a weight basis from the gross production as “FM.” Refer to the LAM for entry instructions.</p> <p>Refer to the LAM for FGIS definition of “FM” and “Dockage.”</p>
58b. Factor	Enter the three-place factor determined by subtracting the percent of FM from 1.000, or subtract the entry in 58a from 100 and divide by 100. Example: For 4 percent, enter “.960.”
59a. Moisture %	Enter moisture percent to tenths. Moisture adjustment is applied prior to applying any qualifying adjustment for quality.
59b. Factor	If grain moisture is more than the allowable limit, enter the four-place moisture factor from the applicable table in exhibit 16.
60a. Test Wt.	Enter test weight (only when storage structure measurements are entered) in whole pounds (or pounds to tenths if so instructed by the AIP). Refer to the LAM for instructions on determining test weight.
60b. Factor	Make No Entry. The dry beans have been converted to actual pounds in column 56 above; therefore, no further adjustment is necessary.
61. Adjusted Production	Result of multiplying 56 x 58b x 59b (Round to whole pounds).
62. Prod. Not to Count	<p>Net production not to count, in whole pounds, when acceptable records identifying such production are available, from harvested acreage which has been assessed an appraisal of not less than the guarantee per acre, or from other sources (e.g., other units or uninsured acreage) in the same storage structure (if the storage entries include such production).</p> <p>This entry must never exceed production shown on the same line. Explain the total bin contents (bin grain depth, etc.) and any “production not to count” in the Narrative.</p> <p>Make no entry if only the depth for production to count has been entered in column “51,” and the depth for production not to count has been entered in the Narrative section. Refer to example in the LAM.</p>

Form Standards - Production Worksheet (Continued)

Item Number / Element	Standard
63. Production Pre-QA	Result of subtracting column 62 from column 61.
64a. Value	<p>Refer to the CP and paragraph 14, of this handbook for QA eligibility requirements. Refer to the SP and LAM for further instructions.</p> <p>Disregard Base Prices.</p> <p>a. Enter the market price per pound of the damaged or conditioned production on the earlier of the date such quality adjusted production is sold or the date of final inspection for the unit.</p> <p>b. If the damaged production has no value, enter “0” and explain it in the Narrative.</p> <p>c. If the buyer/receiver reflects bean value through a weight reduction, Refer to exhibit 9.</p> <p>If a higher price is available at a market within a reasonable distance outside the local market area, this price is used, and transportation costs in excess of transportation costs to the local market are deducted from such price. Refer to the LAM.</p>
64b. MKT Price	<p>Dry Beans</p> <p>If an entry is in item 64a, enter the LMP for U.S. No. 2 dry beans of the same type (refer to the CP). Refer to the LAM for further instructions.</p> <p>Contract seed beans – Make No Entry.</p>
65. Quality Factor	<p>Dry Beans: Enter the result of dividing 64a by 64b, rounded to three decimal places.</p> <p>Quality will be a factor in determining the loss only if the deficiencies, substances, or conditions result in a net price for the damaged or badly damaged production that is less than the LMP.</p> <p>Contract Seed Beans - Make No Entry.</p> <p>If due to insured causes, a Federal or State agency has ordered the insured harvested crop production to be destroyed, enter the factor “.000.” Refer to instructions for items 35, 40, and 41 above, and the Narrative for required documentation.</p>
66. Production to Count	Enter result from multiplying column 63 times column 65, rounded to whole pounds.

Form Standards - Production Worksheet (Continued)

Item Number / Element	Standard
67. Total of Column 63	Total of column 63. If no entry in column 63, make no entry.
For items 68 – 72. When separate line entries are made for varying share, stages, APH yields, price elections, types, etc., within the unit, and totals need to be kept separate for calculating indemnities, make no entry and follow the AIP's instructions; otherwise, make the following entries.	
68. Section II Total:	<p>Preliminary and Replant: Make No Entry.</p> <p>Final: Total of column 66, to whole pounds.</p>
69. Section I Total	<p>Preliminary and Replant: Make No Entry.</p> <p>Final: Enter figure from Section I, column 38 total.</p>
70. Unit Total	<p>Preliminary and Replant: Make No Entry.</p> <p>Final: Total of column 68 and column 69.</p>
71. Allocated Prod	Refer to the LAM for instructions for determining allocated production. Enter the total production allocated to this unit that is included in Sections I or II of the PW. Document how allocated production was determined and record supporting calculations in the Narrative or on a Special Report.
72. Total APH Prod.	Result of subtracting the total of column 37 (item 42 "Totals") and item 71 (Allocated Prod.) from item 70 (Unit Total). If no entries in item 37 and item 71, transfer the entry in item 70. Make no entry when separate APH yields are maintained by type, practice, etc., within the unit.
The following required entries are not illustrated on the PW example below.	
73. Insured's Signature and Date	<p>Insured's (or insured's authorized representative's) signature and date. Before obtaining the signature, review all entries on the PW with the insured (or insured's authorized representative), particularly explaining codes, etc., that may not be readily understood.</p> <p>Final indemnity inspections and final replanting payment inspections should be signed on bottom line.</p>
74. Adjuster's Signature, Code #, and Date	<p>Signature of adjuster, code number, and date signed after the insured (or insured's authorized representative) has signed. For an absentee insured, enter adjuster's code number only. The signature and date will be entered after the absentee has signed and returned the PW.</p> <p>Final indemnity inspections and final replanting payment inspections should be signed on bottom line.</p>
75. Page	<p>Preliminary: Page numbers – "1," "2," etc., at the time of inspection.</p> <p>Replant and Final: Page numbers - (Example: Page 1 of 1, Page 1 of 2, Page 2 of 2, etc.).</p>

41. Mycotoxins exceed FDA, State or other health organization maximum limits? Yes <input type="checkbox"/>																						

NARRATIVE (If more space is needed, attach a Special Report)
 Total acres from FSA permanent field measurements. Field A wheel measured. Example above shows allowance when actual cost (\$12.50/acre) of replanting is less than both 10% of the production guarantee and maximum pounds allowed (120 x 0.500 share = 60 lbs.). Price election is \$0.25. Actual cost divided by price election (\$12.50/\$0.25=50 lbs.). 10% of prod. guar. (1,125 lbs. x 10% x 0.500 share = 57 lbs.). Appraised potential = 50 lbs./acre.

This form example does not illustrate all required entry items (e.g., signature, dates, etc.). Refer to the above Appraisal Worksheet instructions for required statements and signature entries.

Minimum Representative Sample Requirements

Acres In Field Or Subfield	Minimum No. Of Samples
0.1 – 10.0	3
One additional sample is required for each additional 40.0 acres (or fraction thereof) in the field or subfield.	

Row Width Factor

Row Width (Inches)	Square Foot Factor	Row Width (Inches)	Square Foot Factor	Row Width (Inches)	Square Foot Factor
B*	9.0	20	16.7	35	29.2
6	5.0	21	17.5	36	30.0
7	5.8	22	18.3	37	30.8
8	6.7	23	19.2	38	31.7
9	7.5	24	20.0	39	32.5
10	8.3	25	20.8	40	33.3
11	9.2	26	21.7	41	34.2
12	10.0	27	22.5	42	35.0
13	10.8	28	23.3	43	35.8
14	11.7	29	24.2	44	36.7
15	12.5	30	25.0	45	37.5
16	13.3	31	25.8	46	38.3
17	14.2	32	26.7	47	39.2
18	15.0	33	27.5	48	40.0
19	15.8	34	28.3		

*Use a 3.0 foot by 3.0 foot square sample size for broadcast acreage. The square foot factor for broadcast acreage is 9.0.

For row widths not identified in **exhibit 6**, use the following formula:
 (Row Width ÷ 12) X 10 ft. of row = Square Foot Factor rounded to tenths

Example

Row width is determined to be 7.5 inches.

$(7.5 \div 12) \times 10 = 6.25$ rounded to tenths = 6.3 Square Foot Factor

Dry Bean Value Reflected Through Weight Reduction

The buyer/processor may clean/screen the gross production to improve the grade of the dry beans, and reflect the value based on the net weight and grade after removal of the damaged production rather than quoting a grade and price for the gross production as delivered. In this case use the following procedure to determine the net price per pound of the dry bean production.

The adjuster must also get a bid price on the gross amount of the damaged production **for** the quantity and quality/grade as delivered. The greater of this amount or the amount as calculated below will be used for column 64a on the **PW**.

- (1) Subtract the percentage of foreign material from gross production.
- (2) Determine the total cash value (dollar payment) that could have been paid the insured.
Remember to include value for production damaged by uninsured causes (such as checked skins, etc.).
- (3) Divide the total cash value by the adjusted production (after removal of foreign material) to determine the net price of the damaged production.
- (4) Divide the net price by the **LMP** for U.S. No. 2 dry beans of the same type.
- (5) Show all calculations in the Narrative of the **PW** or on an attached Special Report.

See Following Pages For Examples:

Dry Bean Value Reflected Through Weight Reduction (Continued)

Example:

In this example, the buyer/receiver has traded tare for grade.

The elevator may clean/screen the gross production to improve the grade of the dry beans, and reflect the value through a weight reduction (tare %) rather than quoting a grade and price for the gross production as delivered. In this case, the net price per pound of the damaged production will be determined as follows:

- (1) Multiplying the net weight (gross weight minus the tare % weight) of the delivered production by the LMP of the grade of the damaged production after milling; then
- (2) Divide that result by the gross pounds of dry beans delivered.

The result is the **Net Price Per Pound** received for the damaged production.

The adjuster must verify that the weight reduction applied by the buyer/processor is due to insurable causes of loss.

Settlement Sheet

Grower: I.M. Insured

Variety: Pintos							
Date	Scale Ticket #	Gross Weight	Tare %	Tare	Net Weight	Grade	
MM/DD/YY	11002	12,200	44.00	5,368	6,832		
MM/DD/YY	11014	14,360	50.00	7,180	7,180		
TOTAL		26,560		12,548	14,012		

For the purposes of this example, the LMP for U. S. No. 2 dry beans on the day of sale was 20 cents per pound. The insured delivered 26,560 pounds of dry beans to the elevator. 12,548 pounds were deducted from the gross weight, leaving a Net Weight of 14,012 pounds, of U.S. #2 Dry Beans.

STEP 1 Multiply the pounds for which the insured could have been paid by the LMP per pound.
 $14,012 \text{ lbs.} \times \$0.2000 = \$2,802.40$

STEP 2 Divide the dollar amount the insured could have been paid for the damaged production by the gross delivered weight. Enter result in column 64a of the PW as the net price per pound.
 $\$2,802.40 \div 26,560 \text{ lbs.} = \0.1055 per lb.

Dry Bean Value Reflected Through Weight Reduction (Continued)

STEP 3 Enter the **LMP** per pound (\$0.2000) in column 64b of the **PW**.

Example of Warehouse Scale Ticket

In this example the insured has delivered a load of great northern beans to the warehouse. For insurance purposes only, splits, contrasting classes, and foreign material are not to be considered when determining grade. This is an example of a scale ticket.

Refer to the LAM for instructions on who can obtain samples for grading, and who can make determinations of deficiencies, conditions and substances that would cause the crop to qualify for **QA**.

--Warehouse Scale Ticket--			
Date <u>MM/DD/YY</u>			No. 2940
Owner's Name: I.M. INSURED			
Address: ANY TOWN, ANY STATE			
Kind: <i>GREAT NORTHERN</i>		Grade: U.S. Substandard	
Splits 8.5 %	Pick 3.9 %	FM 2.7 %	Moist. % Check Seed Coats %
TOTAL DOCKAGE %		PRICE \$	
47980 lb.	Gross Vehicle & Grain		
15770 lb.	Total Vehicle		
32210 lb.	Gross Grain		
4864 lb.	Dockage		
27346 lb.	Net Grain		
Comments:			

Split Beans - 8.5%; Damaged Beans - 3.9%; Contrasting Classes - 0.6%;
Foreign Material - 2.7%,
Total Defects – 15.7.

Referencing the United States Standards for Beans and the CP, sample would not qualify for **QA**. CP allow for **QA** if the beans fail to grade U.S. No. 2 or better, and are damaged or badly damaged. Considering only damage (3.9%) to determine the grade, the grade would be U.S. No. 2. The sample must grade U.S. No. 3 or worse to qualify for **QA**. (Refer to Exhibit 12.)

% FM is deducted from the gross weight prior to **QA**.

Example of Official Grade Certificate

FORM FGIS-264
JAN 07

UNITED STATES DEPARTMENT OF AGRICULTURE
FEDERAL GRAIN INSPECTION SERVICE
AGRICULTURAL MARKETING ACT OF 1946

Approved OMB No. 0580-0013

COMMODITY SUBMITTED SAMPLE INSPECTION
OFFICIAL PINK CERTIFICATE
EXAMPLE ONLY – NOT FOR OFFICIAL USE

ORIGINAL
US-BAR-1-00014
NOT NEGOTIABLE

LEVEL OF INSPECTION: Original
ISSUED AT: KANSAS CITY, MO
DATE OF SERVICE: November 29, 2011

IDENTIFICATION:
FSN 1234

NOT OFFICIALLY SAMPLED

COMMODITY: Great Northern Beans

RESULTS:

Splits 8.5 %	Contrasting Classes 0.6 %
Foreign Material Total 2.7 %	Total Defects 15.7 %
Stones 0.0 %	Moisture 11.9 %
Classes That Blend 0.0 %	Dockage 2.2 % (10/64 sieve) consist of 0.3% splits; 0.7% small beans and 1.2% other material
Sound Beans 84.3 %	

REMARKS:
After the removal of dockage, this field run sample would have graded U.S. Substandard Great Northern Beans under the U.S. Standards for Beans.

END OF REMARKS

EXAMPLE ONLY – NOT FOR OFFICIAL USE

The sample identification and inspection results shown on this certificate are assigned only to the quantity in the sample and not to any identified center, container, or lot from which the sample may have been taken.

I CERTIFY THAT THE SERVICES SPECIFIED ABOVE WERE PERFORMED WITH THE RESULTS STATED.

APPLICANT NAME: I.M. INSURED
NAME OR SIGNATURE:

ISSUING OFFICE: FGIS - Subjective Analysis and Board Appeals Group

This certificate is issued under the authority of the Agricultural Marketing Act of 1946, as amended (7 U.S.C. 1621 et seq.), and the regulations thereunder (7 CFR 955.1 et seq.), and is receivable in all courts of the United States as prima facie evidence of the truth of the statements therein contained. This certificate does not excuse failure to comply with the provisions of the Federal Food, Drug, and Cosmetic Act, or other Federal Laws.
WARNING: Sec. 205(b) of the Agricultural Marketing Act of 1946 provides that anyone who shall knowingly falsify, make, issue, alter, copy, counterfeits, or use any official certificate, or aid, assist, or be party to such actions, is subject to a fine of not more than \$1000 or imprisonment for not more than 1 year, or both. The results of the inspection are not to be used for any purpose other than that for which they were issued. All actions governing such services shall be accomplished without discrimination as to race, color, religion, sex, national origin, or handicap.
According to the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information is 0580-0013. The time required to disclose this recordkeeping requirement is to average 83.206 hours per recordkeeper annually, including the time to retain such records, and to notify, disclose, and report to third parties such recordkeeping requirements.

Example of U.S. Standards for Beans

130 Grades and grade requirements for the classes Marrow, Great Northern, Small White, Flat Small White, White Kidney, Light Red Kidney, Dark Red Kidney, Small Red, Pink, Black, and Miscellaneous.

	PERCENT MAXIMUM LIMITS OF:						
				Foreign Material			
Grade	Moisture [1]	Total Defects (Total Damage, Total Foreign Material, Contrasting Classes, Splits)	Total Damaged	Total (Includes Stones)	Stones	Contrasting Classes [2]	Classes That Blend [3]
U.S. No. 1	18.0	2.0	2.0	0.5	0.2	0.5	5.0
U.S. No. 2	18.0	4.0	4.0	1.0	0.4	1.0	10.0
U.S. No. 3	18.0	6.0	6.0	1.5	0.6	2.0	15.0

U.S. Substandard shall be beans which do not meet the requirements for the grades U.S. No. 1 through U.S. Sample grade. Beans which are not well screened shall also be U.S. Substandard, except for beans which meet the requirements for U.S. Sample grade.

U.S. Sample grade shall be beans which are musty, sour, heating, materially weathered, or weevily; which have any commercially objectionable odor; which contain insect webbing or filth, animal filth, any unknown foreign substance, broken glass, or metal fragments; or which are otherwise of distinctly low quality.
 [62 FR 52967, Oct. 10, 1997]

[1] Beans with more than 18.0 percent moisture are graded High moisture.

[2] Beans with more than 2.0 percent contrasting classes are graded Mixed beans.

[3] Beans with more than 15.0 percent classes that blend are graded Mixed beans.

[47 FR 19311, May 5, 1982] [47 FR 20547, May 13, 1982] [60 FR 36030, July 13, 1995] [62 FR 52967, Oct. 10, 1997] [69 FR 75504, Dec. 17, 2004]
