Commodity Exchange Price Provisions
Section II – Cotton**

The Commodity Exchange Price Provisions (CEPP) are an extension of the Common Crop Insurance Policy Basic Provisions and the Area Risk Protection Insurance Basic Provisions, along with the Crop Provisions, for the following crops: barley, canola (including rapeseed), corn, cotton, flax, grain sorghum, oats, rice, rye, soybeans, sunflowers, and wheat.

The CEPP has two sections. Section I - General Information, contains information relevant for all applicable crops, including definitions and common policy material. Section II contains crop-specific projected and harvest price definitions and specifications, including commodity exchanges, contracts, and discovery periods and is used in conjunction with Section I – General Information. There is a separate Section II document for each crop. This is the Section II document for cotton.

Definitions

Projected price - The harvest year's average daily settlement price for the projected price discovery period for the harvest year's futures contract, as shown in the tables below, rounded to the nearest whole cent. Note: Pre-harvest year's daily settlement prices through December 31 are included in the average for the January 31 sales closing date.

Harvest price - The harvest year's average daily settlement price for the harvest price discovery period for the harvest year's futures contract, as shown in the tables below, rounded to the nearest whole cent.
