*Crops/crop programs which are currently insured under pilot programs of limited scope and duration.

**Crops/crop programs which were submitted and approved under section 508(h) of the FCI Act.

The following tables provide market penetration by categories of Fruits/Nuts and Vegetables. The Risk Management Agency (RMA) and the National Agricultural Statistics Service (NASS) Specialty Crop Comparisons Tables follow. These tables establish current participation rates for specialty crops. RMA acres are calculated using both Catastrophic (CAT) and buy-up level participation. The NASS acres used were the complete population of cropped acres. In rare instances, RMA acres exceed NASS acres, as seen in the specific state and crop tables located below. This is because NASS data doesn't include prevent plant acres.
