Type 81 - Output Format for Year 1999**

POLICY KEY INFORMATION USED FOR ALL RECORD TYPES.

Field No.	Field Name	Begin Pos	Size	Picture	Field Edits
1	RECORD TYPE	1	2	XX	Will be 81
2	REPORTING ORGANIZATION	3	2	XX	**
3	POLICY STATE	5	2	XX	LOCATION STATE for Reinsured/FSA policy, RATE STATE for FCIC policy. **
4	POLICY PREFIX	7	3	XXX	COMPANY/SERVICING COUNTY for Reinsured/FSA policy, RATE COUNTY for FCIC policy. **
5	POLICY NUMBER	10	7	X(07)	**
6	CROP YEAR	17	4	9(04)	**

** From policy which initiated the inquiry when message code is B, N, or S. From retrieved policy data when MESSAGE CODE is D, P, or T.

PHT is designed to be an informational reporting tool for either a 1 year or 5 year inquiry request for an active processing year. When a 1 Year inquiry request is submitted, the requestor will receive **only** the previous year's data information. When a 5 Year request is submitted, the requestor will receive the previous 5 years, providing data is available. The layout of Record 81 with it's respective record types will not always be in the same order/sequence as the records submitted for editing. The procedure is NOT designed to provide a specific year upon request.

Information retrieved from a PHT request – submitted with the type 10/14 record – is based ONLY on the primary insurer's SSN taken from the type 10 record. Limited information is provided on SBI's, affiliated with the primary insurer, not to include crop or cross-reference data.

PHT is designed to be an informational reporting tool for either a 1 year or 5 year inquiry request for an active processing year. When a 1 Year inquiry request is submitted, the requestor will receive **only** the previous year's data information. When a 5 Year request is submitted, the requestor will receive the previous 5 years, providing data is available. The layout of Record 81 with it's respective record types will not always be in the same order/sequence as the records submitted for editing. The procedure is NOT designed to provide a specific year upon request.

Information retrieved from a PHT request – submitted with the type 10/14 record – is based **ONLY** on the primary insurer's SSN taken from the type 10 record. Limited information is provided on SBI's, affiliated with the primary insurer, not to include crop or cross-reference data.

PHT is designed to be an informational reporting tool for either a 1 year or 5 year inquiry request for an active processing year. When a 1 Year inquiry request is submitted, the requestor will receive **only** the previous year's data information. When a 5 Year request is submitted, the requestor will receive the previous 5 years, providing data is available. The layout of Record 81 with it's respective record types will not always be in the same order/sequence as the records submitted for editing. The procedure is NOT designed to provide a specific year upon request.

Information retrieved from a PHT request – submitted with the type 10/14 record – is based **ONLY** on the primary insurer's SSN taken from the type 10 record. Limited information is provided on SBI's, affiliated with the primary insurer, not to include crop or cross-reference data.

PHT is designed to be an informational reporting tool for either a 1 year or 5 year inquiry request for an active processing year. When a 1 Year inquiry request is submitted, the requestor will receive **only** the previous year's data information. When a 5 Year request is submitted, the requestor will receive the previous 5 years, providing data is available. The layout of Record 81 with it's respective record types will not always be in the same order/sequence as the records submitted for editing. The procedure is NOT designed to provide a specific year upon request.

Information retrieved from a PHT request – submitted with the type 10/14 record – is based **ONLY** on the primary insurer's SSN taken from the type 10 record. Limited information is provided on SBI's, affiliated with the primary insurer, not to include crop or cross-reference data.

PHT is designed to be an informational reporting tool for either a 1 year or 5 year inquiry request for an active processing year. When a 1 Year inquiry request is submitted, the requestor will receive **only** the previous year's data information. When a 5 Year request is submitted, the requestor will receive the previous 5 years, providing data is available. The layout of Record 81 with it's respective record types will not always be in the same order/sequence as the records submitted for editing. The procedure is NOT designed to provide a specific year upon request.

Information retrieved from a PHT request – submitted with the type 10/14 record – is based **ONLY** on the primary insurer's SSN taken from the type 10 record. Limited information is provided on SBI's, affiliated with the primary insurer, not to include crop or cross-reference data.
