Approved RO Determined Yield: The yield determined by the Regional Office, according to their procedures, based upon documentation submitted by the producer through the AIP, used to determine the guarantee.

Yield Descriptor: The applicable yield descriptor as provided in CIH Exhibit 15W, the RO Determined Yield, or RO UG.

Yield Indicator: The applicable yield indicators and special case indicators as provided by CIH Exhibit 15V, the RO Determined Yield or RO UG.

YC & Floors: Are not authorized for RO Determined Yield requests or Underwriting Guidelines.

If YA is applied by the RO through the RO Determined Yield or through RO UG then the AIP must send the YA option code on the acreage record through PASS. If YA was elected on a non-contiguous rated crop, then the surcharge flag on the acreage record must also be set to establish the .05 multiplicative rate. The yield record will not include the YA option codes. See AD for crops with the surcharge.
