ACTION

Refer to the (FCIC 18010) Crop Insurance Handbook Exhibit 17B(5) and Exhibit 17G for specific instructions on actual production history (APH) determinations. When transitional yields (T-yields) are needed to complete the 4-year minimum APH database or when constructing the yield floor value or yield adjustment (YA) substitution, T-yields must first be factored to the current year's equivalent. Please refer to the linked tables for instruction specific to each crop's table.

We have included years 1984 - 2019. If you require factors for years prior to 1984, please contact the Spokane Regional Office by email at lacey.menasco@usda.gov.
